## Who I am

### NRF : Key Player in Research Eco-system

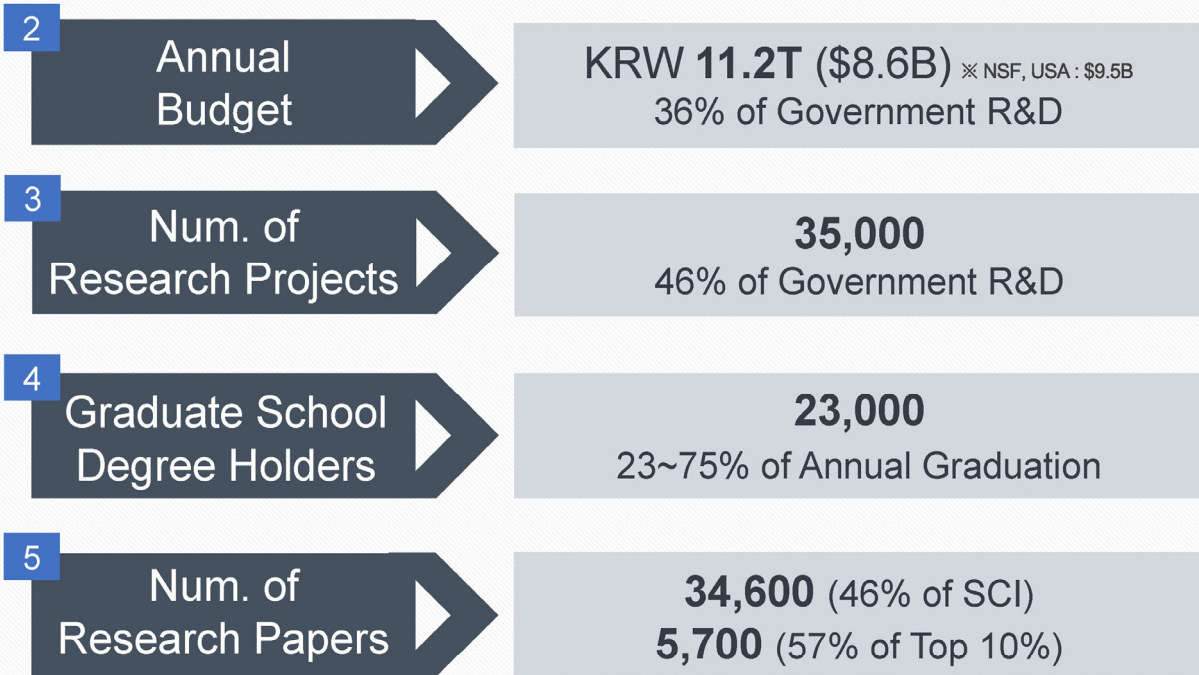

1 Target Research, Role & Responsibility

All Fields of Research & Researcher (Basic, Innovative & Challenging)

Efficient and Fair Support for Academic and R&D Activities and Human Resource Training and Utilization

# NRF : Key Player in Research Eco-system

※ The statistics include the affiliated institution, IITP(Institute of Information & Communications Technology Planning & Evaluation)

※ 1USD = 1,300 KRW

5

# Ultimate Goal of NRF

<b>Mission</b>	Contribution to the creation of knowledge, values & advancement of human society through creative research & the cultivation of future talent			
<b>Vision</b>	A global leader driving innovation in the academic and research ecosystem			
<b>Core Values</b>	C Creativity	O Openness	R Responsibility	E Excellence

## 2024~2028 Strategic Goals

Advancement of Academic & Research Innovation Platform	Leading the National Research Paradigm	Fostering Innovative Talent for the Future	Sharing Research Outcomes via Public Engagement & Communication	Enhancing ESG Practice & Management Efficiency
--	--	--	---	--

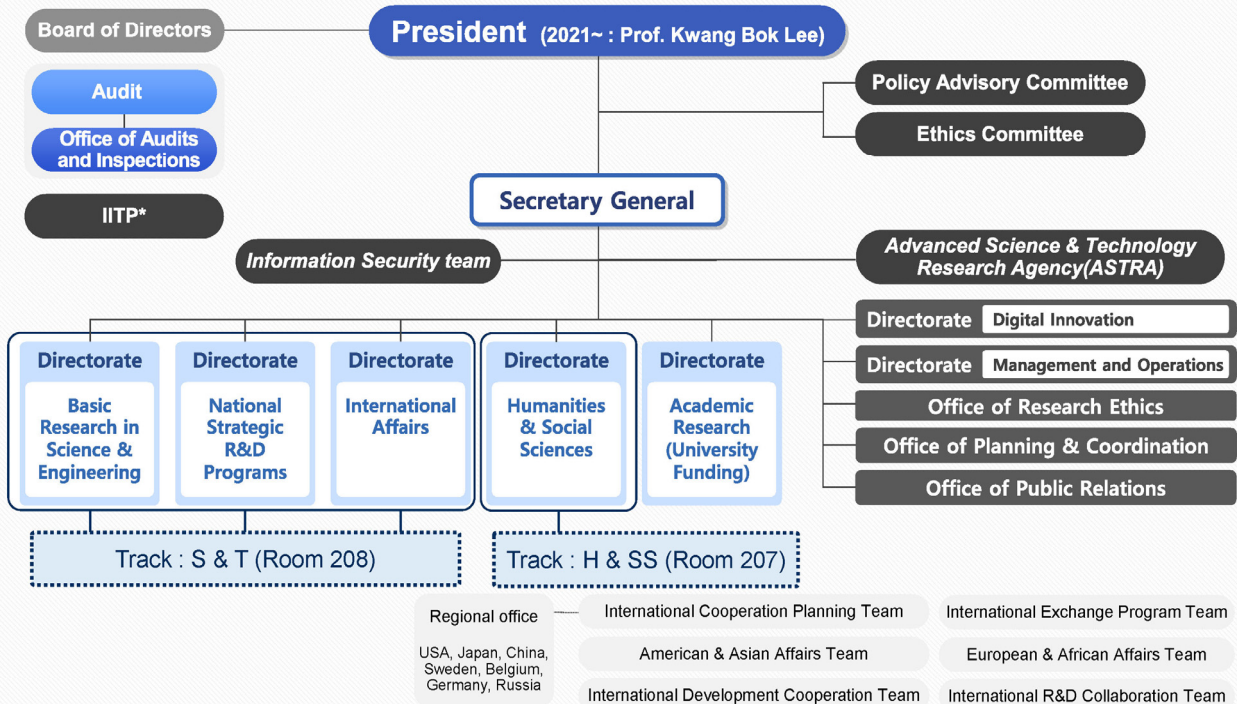

※ NRF 2024~2028 Strategic Plan : 5 Strategic goals – 20 Objectives – 59 Action plans – 86 KPIs (Oct. 2023)

6

# 02

## Organization & Budget

### Organization

※ NRF : The most representative Funding Agency in Korea (Budget : 50% from the Ministry of Science and ICT, 50% from the Ministry of Education)

\* IITP: Institute of Information & Communications Technology Planning & Evaluation (Affiliated Organization)

# Organization

# Budget in 2024

**KRW 9,624B in total (USD 7.4B in total)**

(Unit: KRW 1B, %)

Major Directorates	2023 (A)	2024 (B)	Change (B-A)	Budget Share (2024)
Basic Research in Science & Engineering	2,585	2,591	6.5	27%
National Strategic R&D Programs	2,501	2,356	△145	25%
International Affairs	111	1,143	3	1%
Humanities & Social Sciences	280	281	0.8	3%
Academic Research	3,881	4,282	401	44%
<b>Total</b>	<b>9,358</b>	<b>9,624</b>	<b>266</b>	<b>100%</b>

# 03

## Funding Program

### Basic Research Program in Science & Engineering

**Basic Research Program**

Promotion of basic research projects centered on creative and challenging ideas of researchers (Bottom-up)

**Roles & Responsibilities**

- Providing support for basic R&D and human resource development
- Driving qualitative growth of national basic research capabilities
- Serving as a platform of basic research support in science and technology

**Major Programs**

Growth Stage Category	Early Stage		Research careers steps			Mature		
	<b>Individual Research 1</b> (Research capacity)	Next-generation Researchers		Outstanding Grants				
	Research Grants for Ph.D. Student	Post-doctoral Grant Training	Young Researchers	Mid-career Researchers	Leader Grants			
<b>Individual Research 2</b> (Research safety-net)	Support for Balanced Development of Studies				Broadening Opportunities Grants			
	Early Career Researcher	Underserved Area	Regional Researcher	Interdisciplinary Convergence	First Research in Lifetime	General Grants	Bridge Grants	
<b>Infrastructure-Building Group Research</b>	Building of University Research Infrastructure				Group Research			
	Research Facility Establishment Program	Priority Research Institute Program	Basic Research Laboratory	Centers of Research Excellence				

# National Strategic R&D Program

**National Strategic R&D** Promotion of national strategic R&D projects for timely response to the demand for technology development at the national level (Top-down, Middle-up)

**Roles & Responsibilities**

- Securing the national growth engine & improving the quality of life
- Intensive supporting for national strategic technologies (Mission-Oriented Program)
- Supporting for original technologies including bio, nano S&T, materials, high-convergence, space, nuclear energy, etc.

Major Programs	
<b>Bio &amp; Medical</b>	Bio & medical technology development, brain Research, development of pharmaceuticals
<b>Nano &amp; Material</b>	Nano & material development, next-generation intelligent semiconductor development
<b>High-tech Convergence Computing</b>	STEAM (Science and Technology Enhanced by liberal Arts and Mission) program, quantum computing technology
<b>Energy &amp; Environment</b>	Advancing carbon recycling technologies, R&D program for climate change research, future hydrogen energy Innovation
<b>Space Technology</b>	Development of satellites, space launch vehicles, space core technologies, lunar exploration program
<b>Nuclear &amp; Radiation</b>	Nuclear energy technology development, radiation technology development, accelerator core technology development program
<b>Social welfare Technology</b>	Development for solving issues in people's lives, disaster response technology development

# International Cooperation Program

**International Cooperation** Promotion of international exchange and cooperation for science and technology and academic research

**Roles & Responsibilities**

- Contributing to solving global common issues and supporting researchers' autonomous international cooperation activities
- Enhancing exchange of researchers and knowledge through various international collaboration programs

Major Programs		
<p><b>Exchange Program</b></p> <ul style="list-style-type: none"> <li>▪ Research exchange of students and researchers</li> <li>▪ Joint seminars and workshops</li> <li>▪ Other international cooperation activities</li> </ul>	<p><b>Joint Research Program</b></p> <ul style="list-style-type: none"> <li>▪ Joint research with partner countries</li> <li>▪ R&amp;D cooperation activities</li> <li>▪ Mid-and-large scale programs for developing cutting-edge technologies</li> </ul>	<p><b>ODA Program</b></p> <ul style="list-style-type: none"> <li>▪ ODA activities in science and technology</li> <li>▪ Leading University Project for International Development Cooperation</li> </ul>

# Academic Support Program in Humanities & Social Sciences

**Humanities & Social Sciences** Support for academic and basic research in humanities and social sciences & promotion of R&D achievements

### Roles & Responsibilities

- Establishing and supporting the academic promotion policy and system in humanities and social sciences (including arts and physical education)
- Korea's only organization dedicated to academic support in humanities and social sciences

### Major Programs

# Academic Promotion Program for Education & HR Development

**Academic promotion program** Facilitating academic research, human resource development & university-industry cooperation projects

### Roles & Responsibilities

- Improving the fundamentals of universities to respond to the era of the 4th industrial revolution
- Enhancing the research quality and HR development capacity through university assistant programs

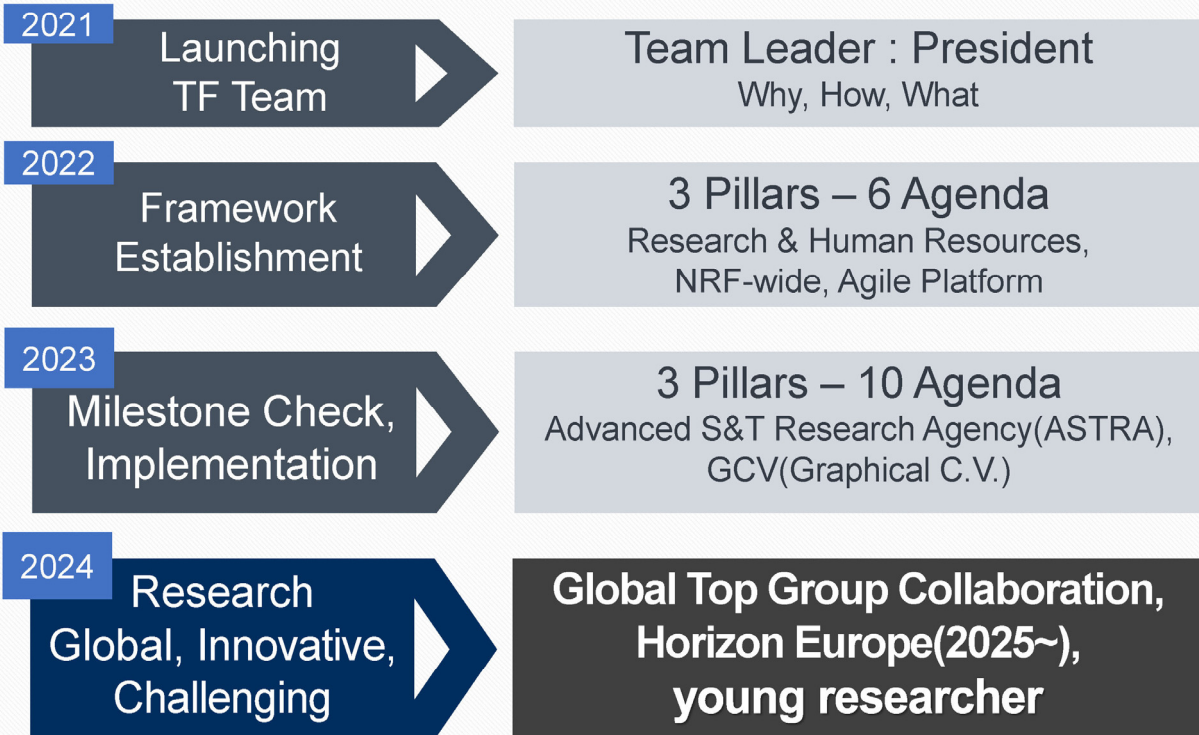

### Major Programs

# 04

## Innovation of NRF

### Strategic Platform to Leap beyond Today

## Introduction of Basic Research Program

# Overview of Basic Research Program

- Individual Research** To foster our country's basic research capabilities by providing research funds to individuals.
- Group Research** To support excellent research groups in fostering key research areas to achieve a world-class standard

2024					
Program		Annual research fund budget	Research period(maximum)	'24 budget (million won)	
Individual Research	Global Leader Grants	Appx. 800 million won	9 years(3+3+3)	67,244	
	Consolidator Grants	Type2(Global Research)	Appx. 400 million won	1~3 years, 4 years(3+1), 5 years(3+2)	179,176
		Type1	Appx. 300 million won	1~3 years, 4 years(3+1), 5 years(3+2)	847,259
		Creative Research program	Appx. 70 million won	1~3 years	9,800
	Young Scientist Grants	Hanwoomul-Phagi Basic Research	Appx. 200 million won	10 years(5+5)	9,000
		Outstanding Young Scientist Grants	Appx. 300 million won	1~3 years, 4 years(3+1), 5years(3+2)	270,178
		Sejong Science Fellowship (Domestic Track, Overseas training Track)	Appx. 70~130 million won	Domestic Track 5 years(3+2), Overseas training Track 1 year	129,860
		Infrastructure supporting Grants of Young Scientist	Appx. 500 million won	1 year	60,000
Group Research	Global Centers of Research excellence	1,400~5,000 million won	7~10 years	232,765	
	Global Basic Research Laboratory	Appx. 500 million won	1~3 years	186,933	

# Basic Research Program Budget

Ministry of Education
 Ministry of Science and ICT

The budget of basic research project had been doubled by 2022 compared to 2017 and has been maintained from 2023

**2024 Basic Research Budget : 2,633billion won (MSIT + MOE)**  
 MSIT Budget : 2023 2,050 → 2,118billion won (68billion won increase)

(Unit : projects, million won)

		2023							
		Program	New project		Ongoing project		Total		
Individual Research	Outstanding Grants	Global Leader Grants	8	4,365	94	72,495	102	76,860	
		Consolidator Grants	1,577	219,289	4,974	772,213	6,551	991,502	
		Young Science Grants	Hanwoomul-Phagi Basic Research	15	2,855	-	-	15	2,855
			Outstanding Young Scientist Grants (including First Innovation Laboratory grants)	401	59,518	1,464	166,646	1,865	226,164
			Sejong Science Fellowship	Domestic Track	150	17,213	579	66,494	729
	Overseas training Track	44		3,234	-	-	44	3,234	
	Broadening Opportunities Grants	General Grants	923	47,001	3,075	169,623	3,998	216,624	
Starting Grants		203	5,012	992	30,770	1,195	35,782

	Global Basic Research Laboratory	133	53,396	255	125,159	388	178,555		

1<sup>st</sup> Announcement : 2023.12.29 ~ 2024.2.2, For all Individual Research Program

2<sup>nd</sup> Announcement : 2024.5.14 ~ 2024.6.13, Only for Consolidator Grants Type 1 and Creative Research program

	Global Leader Grants	Consolidator Grants	Young Scientist Grants	Group Research Program
New Project budget	6,750 million won	357,300 million won	241,485 million won	112,626 million won
New Project	Appx. 12 projects (including around 3 Follow-up New projects)	Type2 (Global Research) 108 projects  Type1 1st : 1,243 projects 2nd : 109-131 projects  Creative Research 120-140 projects	Hanwoomul-Phagi 30 projects  Outstanding Young Scientist 644 projects  Sejong Science Fellowship 485 projects (Domestic 330 projects, Overseas 155 projects)  Infrastructure Supporting for Young Scientist Appx. 200 projects	Global Centers of Research excellence 20 projects  Global Basic Research Laboratory 155 projects

✓ The number of selected projects and the support budget may vary depending on the budget situation and the results of the application and evaluation.

# 02

## Program Details

### 1

### Consolidator Grants

Research Starting on May 1st and September 1st

	Type2(Global Research Program) (1st)	Type1(1st·2nd)	Creative Research Program (2nd)
Eligibility	Faculty members (Tenure/non-tenure track, full-time/ contract) in University, Or Researchers at Public/Private Institution		
Research Period	1~3 years, 4 years(3+1), 5 years(3+2)		1~3 years
Annual budget	Appx. 400 million won/year	Appx. 250 million won/year (For the Global Collaborative Projects, Appx. 300 million won /year)	Appx. 70 million won/year
The number of new projects	108 projects	1 <sup>st</sup> : 1,243 projects 2 <sup>nd</sup> : 109~131 projects	120~140 projects

- Consolidator Grants are announced twice and researchers can apply for the same type only once a year
- Only one chance of application for Consolidator Grants Type1
- For the Global Collaborative Consolidator Grants Type1, maximum 50 million won will be additionally supported

## 2

## Hanwoomul-Phagi Basic Research

## Research Starting on May 1st

Eligibility	Faculty members (Tenure/non-tenure track, full-time/ contract) in University, Or Researchers at Public/Private institution who have received their Ph.D within 15 years
Research Period	10 years(5+5)
Annual budget	Appx. 200 million won/year
The number of new projects	30 projects

29

## 3

## Outstanding Young Scientist Grants

## Research Starting on April 1st

Eligibility	Full time Faculty members or Full time researchers at Public/Private Institution Within 7 years after Ph.D, or 39 years old(younger)
Research Period	1~3 years, 4 years(3+1), 5 years(3+2)
Annual budget	Appx. 250 million won/year(For the Global Collaborative Projects, Appx. 300 million won /year)
The number of new projects	644 projects

• For the Global Collaborative Outstanding Young Scientist Grants, maximum 50 million won will be additionally supported

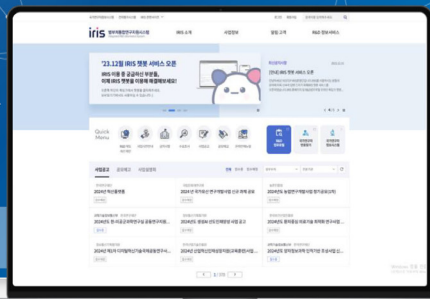

30

## Individual Research & Group Research Program

		Announcement	Application Schedule	Starting Date	
Individual Research	Global Leader Grants	'23.12.29.	'24.1.19. ~ 2.2. (Institute Approval ~ 2.7.)	8.1.	
	Consolidator Grants			Type2(Global Research)	5.1.
				Type1	
	Young Scientist Grants	Hanwoomul-Phagi Basic Research	4.1.		
		Outstanding Young Scientist Grants			
Consolidator Grants	Type1	'24.5.14.	'24.6.4. ~ 6.13. (Institute Approval ~ 6.18.)	9.1.	
	Creative Research				
Group Research	Global Centers of Research Excellence, Global Basic Research Laboratory	'23.12.29.	'24.2.22. ~ 3.6. (Institute Approval ~ 3.11.)	8.1.	

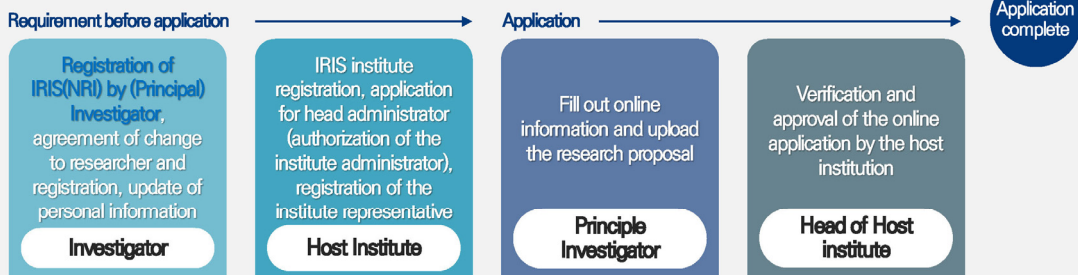

2024 Basic Research Projects, the applications for all projects, should be submitted, evaluated and managed through IRIS(<https://www.iris.go.kr>) managed by Korea Institute of Science & Technology Evaluation and Planning (KISTEP) instead of existing e-R&D of National Research Foundation of Korea

Integrated R&D Information System  
A government-wide integrated research support system

## Application method through IRIS

After the principal investigator log in IRIS(<https://www.iris.go.kr>), fill out online information and upload the research proposal, the institute verify and approve applications.

※ Before submitting the application, please check with the administrators that manages research processes at the host institute about the possibility for the host research institute's approval

Basic Research Program announcement, application guideline, research proposal forms can be found on the National Research Foundation website.

## Evaluation Process

	1 Online review	2 Panel review	3 Panel presentation review
Project classification	Same / Similar RB <sup>1)</sup> 5~10 projects	Same / Similar RB or CRB <sup>1)</sup> About 20 projects	Same / Similar RB About 10 projects
Reviewers	About 5 people	About 12 people	About 12 people
Evaluation Results	averaging scores of reviewers excluding Highest and lowest ones	Which project "selected"	Which project "selected"

1) RB(Review Board), CRB is the research area that researchers fill out when applying.  
For example, financial mathematics(RB), mathematics(CRB)

			1 <sup>st</sup> Evaluation	2 <sup>nd</sup> Evaluation	
Ministry of Science and ICT	Individual Research	Global Leader Grants		Panel Review	Panel Presentation Review
		Consolidator Grants	Type2(Global Research)	Panel Review	Panel Presentation Review
			Type1	Online Review	-
		Young Scientist Grants	Creative Research Program	Online Review	-
	Hanwoomul-Phagi Basic Research		Panel Review	Panel Presentation Review	
	Group Research	Outstanding Young Scientist Grants		Online Review	-
Global Centers of Research excellence		Panel Review	Panel Presentation Review		
Global Basic Research Laboratory		Panel Review	Panel Presentation Review		

- It can be changed according to the evaluation plan.  
Panel review and Panel presentation evaluation are operated flexibly in a face-to-face/online

- ✓ For Panel Review or Panel Presentation review, the panel determines which project "selected" or "not selected" based on evaluation criteria and percentage

### ▶ Consolidator Grants

Evaluation criteria	Type2(Global Research)		Type1	Creative Research Program
	1 <sup>st</sup> Panel Review	2 <sup>nd</sup> Panel Presentation Review	Online Review	Online Review
Creativity and Originality of Research	40%	30%	40 points	50 points
Research Content and Method	20%	20%	20 points	20 points
Research Budget and Duration	10%	-	10 points	-
Excellence of Researchers (Research Team)	Type2, Type1	20%	40%	20 points
	Creative Research Program	-	-	20 points
Impact of Research Results	10%	10%	10 points	10 points
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100 points</b>	<b>100 points</b>

### ▶ Outstanding Young Scientist Grants

Evaluation criteria	Online review
Creativity, Originality and Challenges of Research	50 points
Research Content and Method	20 points

Excellence of Researchers(Research Team)	10 points
Impact of Research Results	10 points
<b>Total</b>	<b>100 points</b>

### ▶ Hanwoomul-Phagi Basic Research

Evaluation criteria	1 <sup>st</sup> Panel Evaluation + 2 <sup>nd</sup> Panel Presentation Review
Creativity, Originality and Challenges of Research	40%
Research Content and Method	30%
Impact of Research Results	30%
<b>Total</b>	<b>100%</b>

# 04

## FAQ

### FAQ

**Question 1**

I'm currently on going in individual Basic research program. Is it possible to apply for the Individual Basic Research Program this year?

**Answer 1**

No, it is not possible.  
However, if an ongoing project would end by December 31 in 2024, you can apply for

**Question 2**

Can I write the research proposal in English?

**Answer 2**

Yes, you can write it in English

**Question 3** What are the methods for global collaborative research?

**Answer 3** Global collaborative research can take various forms, and researchers can choose any of these following options based on their preferences.

Type	Details
Participation of researchers	Participation of researchers from overseas research institutes as co-investigators or researchers
	Recruitments of an overseas researcher(doctoral levels) (an invitation of overseas researchers, etc.)
	Visits by overseas researchers(including students) to a domestic institution and participation in research projects(more than 4 weeks per year)
	Visits by domestic researchers (co-investigators/researchers) to overseas institutions (as visiting professors, etc.)
	Visits by domestic researchers (junior researcher/student and postdoctor, professor) to the overseas research institution and participations of research projects (more than 4 weeks/year)
Visits	Mutual visits of principal investigators to the counterpart institution (more than 2 weeks/year)
Use of research facilities or equipment	Collaborative Use of Research Equipment(Especially specialized or high-cost equipment)
Establishment of global network	International Joint Academic Conferences/Conventions/Symposiums/Seminars/Workshops* held domestically or internationally
Establishment/operation of joint research center	Establishment/operation of base research laboratory at domestic or overseas research institutes
Others	Others (feasible global collaborative research approaches for each research project)

**Question 4** What does the additional 50 million won support mean for Consolidator Grants and Young Scientist Grants' global collaborations?

**Answer 4** The funding for these two programs is 250 million won annually. However, if researchers engage in global collaborative research, as explained earlier, they will receive an additional 50 million won

**Question 5** I applied for Consolidator Grants Type1 but failed. Can I apply again in the second announcement?

**Answer 5** You cannot apply for the same type again. However, you can apply for a different type, for example the Creative Research Program if you qualify.

# Thank you

# Introduction

## NRF Organization

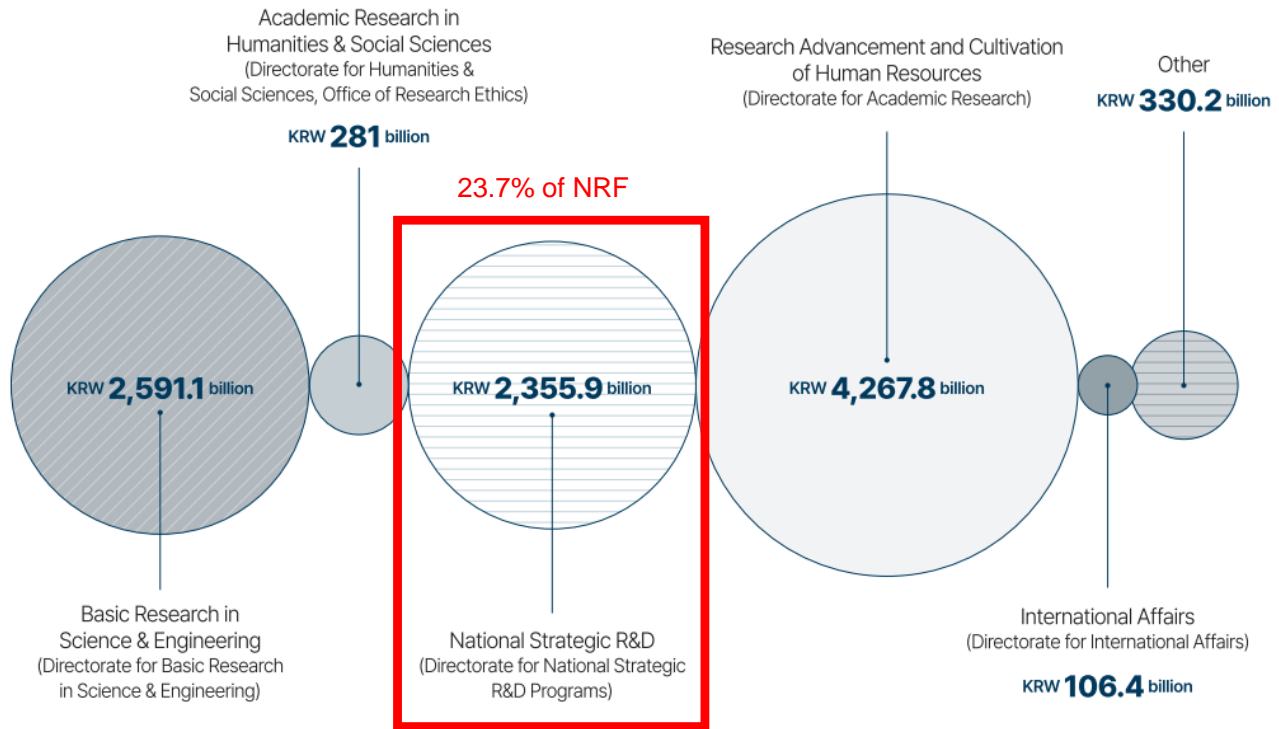

Institute of Information & Communications Technology Planning & Evaluation (IITP)

## Budget

Total KRW **9,932.4** billion

\* Based on the budget confirmed by the National Research Foundation of Korea Board of Directors for 2024 (February 2024)

## Objective and Support Areas

Vision of the 5th Basic Plan for Science and Technology (2023-2027)

### A Progressive Future Driven by Scientific and Technological Innovation

**Advancing the National Science and Technology Policy Vision**  
by Identifying and Funding Strategic National Areas through Government-Funded Research Projects

#### Major Areas for Funding & Programs

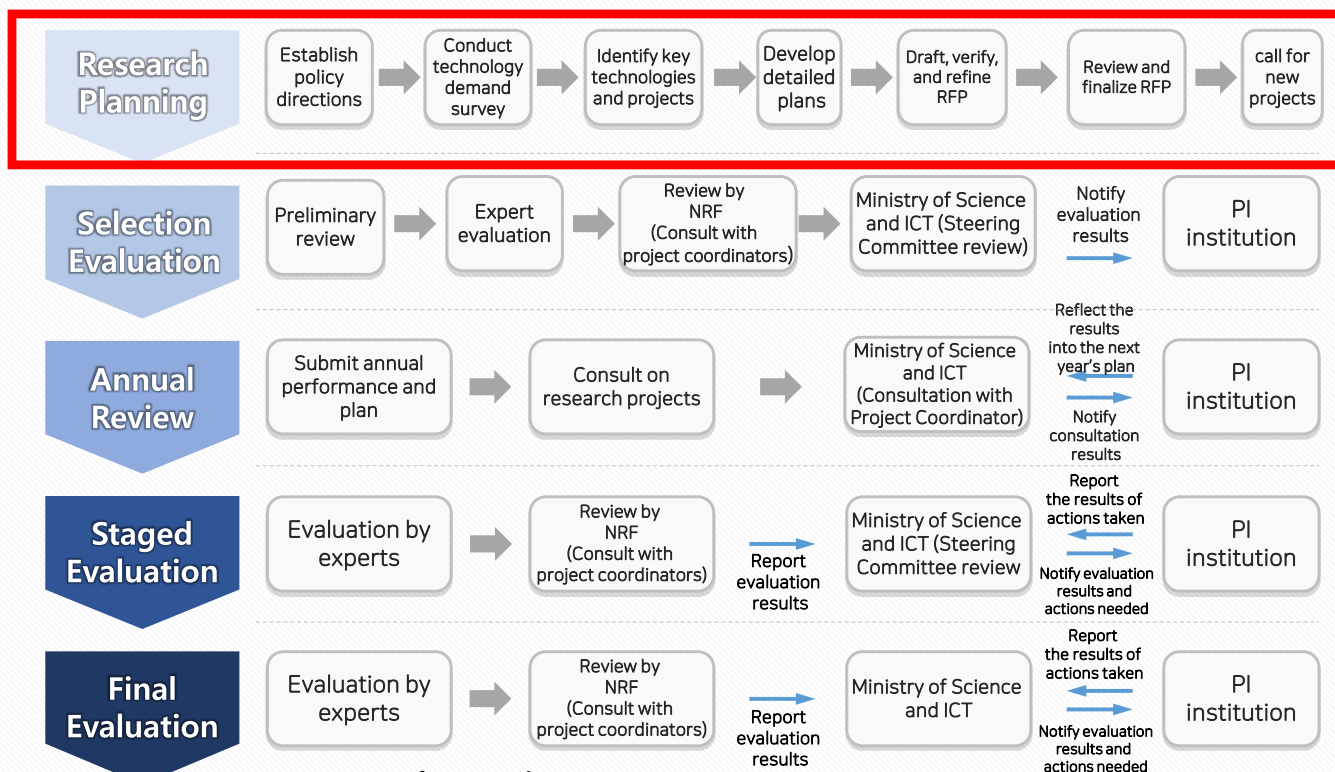

Life Science / Biomedical Science	Development in Bio- and medical technologies, Pioneering fundamental research in neuroscience, National drug development programs, etc.
Nanotechnology / Materials	Advancements in nanotechnology and material sciences, Enhancement of material discovery initiatives, Development of next-generation intelligent semiconductor technologies, etc.
Advanced Convergence and Computing	STEAM research projects, Quantum computing technology development, Advanced utilization of high-performance computing, etc.
Energy / Environment	Development of fundamental technologies for marine and polar regions, Advancing technologies to minimize climate change impact, Energy cloud technology, etc.
Promotion of Space Development	Artificial satellite development, Space launch vehicle development, Core space technology development initiative, etc.
Nuclear Power / Radiation	Nuclear Energy research and development initiatives, Advancement in technologies for radiation application, Support for heavy ion accelerator construction, etc.
Public Technology	Research aimed at addressing social challenges (including the development and demonstration of innovative products based on public demand, etc.), Development of disaster and emergency response technologies, etc.

※ Number of Projects Funded in 2024: 2,374 (New: 483 projects, Ongoing: 1,891 projects)

# II

## Program process

### Planning and Review Process

**STEP 1**

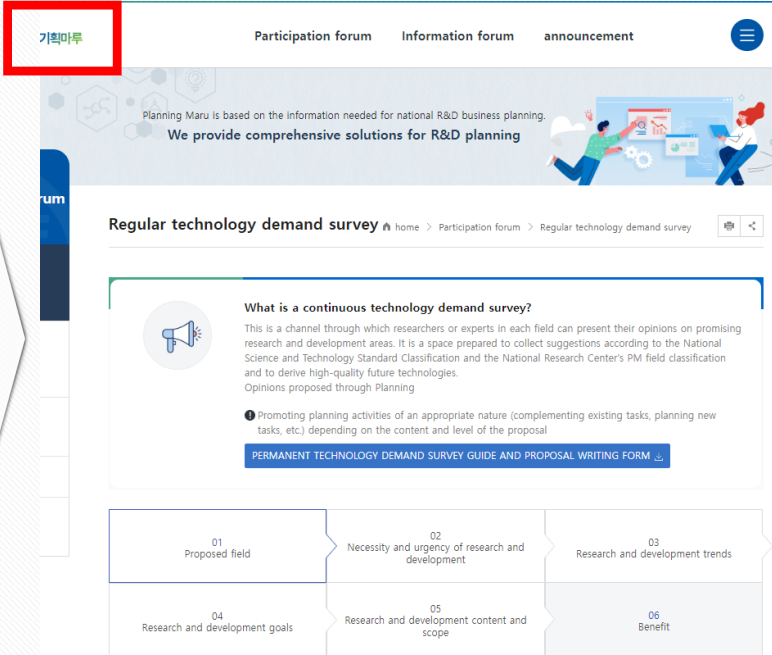

① Access “Planning Maru(기획마루)” at <https://plan.nrf.re.kr/kor/index>  
※ The website is available in English by using the Chrome browser

**STEP 2**

② Download the “Regular Technology Demand Survey Guides and Proposal Form”

**STEP 3**

③ Complete and submit the survey proposal  
⇒ The submitted proposal is classified into the PM category of the Directorate for National Strategic R&D Programs and reviewed by experts. If selected, the proposal is reflected in the program planning.

기획마루

Participation forum Information forum announcement

Planning Maru is based on the information needed for national R&D business planning.  
We provide comprehensive solutions for R&D planning

Regular technology demand survey home > Participation forum > Regular technology demand survey

**What is a continuous technology demand survey?**  
This is a channel through which researchers or experts in each field can present their opinions on promising research and development areas. It is a space prepared to collect suggestions according to the National Science and Technology Standard Classification and the National Research Center's PM field classification and to derive high-quality future technologies.  
Opinions proposed through Planning

① Promoting planning activities of an appropriate nature (complementing existing tasks, planning new tasks, etc.) depending on the content and level of the proposal

[PERMANENT TECHNOLOGY DEMAND SURVEY GUIDE AND PROPOSAL WRITING FORM](#)

01 Proposed field	02 Necessity and urgency of research and development	03 Research and development trends
04 Research and development goals	05 Research and development content and scope	06 Benefit

3. **ICT** Fundamental R&D Program
4. **Quantum Science and Technology** R&D Program
5. **Convergence Technology** Development Program
6. **Climate Environment** R&D Program
7. **Nuclear** R&D Program

## 1. **Biotechnology** Development Program

### Overview

#### Program Overview

**(Purpose)** To support the acquisition and practical application of core and advanced biotechnologies directly related to public life and health, including new drugs, medical devices, precision medicine, and neuroscience

**(2024 Budget)** 542.146 billion KRW

**(Key Area)** New drugs, regenerative medicine, infectious diseases, gene editing, neuroscience, and medical devices

#### 2024 Focus Areas

Accelerate biotechnology innovations through focused support for the acquisition of advanced biotechnologies and promising future technologies, the convergence between bio and digital technologies, and the creation of an ecosystem for biotechnology innovations

※ (National Agenda 75-3) Promote bio-transformation and digital biotechnology

**(Advanced Biotechnologies with enabling technology)** Promote advanced biotechnologies underpinning the creation of new future industries and markets and the advancement of biomedical engineering, including engineering biology, gene and regenerative therapy, and innovative new drugs

**(Digital Bio)** Support convergence research between biotechnologies and advanced digital technologies to overcome the limitations of high-risk and high-cost biotechnology R&D

**(Biotechnology Innovation Ecosystem)** Build a robust R&D foundation for biotechnology innovations by developing multidisciplinary talents and establishing advanced infrastructure, while fostering an ecosystem that encourages both domestic and international cooperation

# 1. Biotechnology Development Program

## Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget	Project Name	Purpose of the Project	'24 Budget
Bio-medical Technology Development	Acquisition and practical application support of core and advanced medical technologies directly related to public life and health, such as new drugs and stem cells	3,043	Korean Medicine Digital Convergence Technology Development Project (lood Cells and Platelets)	Creating innovative fundamental technologies unique to our country through the convergence of Korean medicine with various knowledge and technologies to solve national challenges and modern medical issues and respond to future diseases	9
Future Brain Convergence Technology Development	Development of future core brain convergence technologies through the fusion of ultra-convergence and ultra-connectivity technologies, which are key element technologies of the 4th Industrial Revolution, with neuroscience	9		Securing cell-based artificial blood production technologies, establishing artificial blood manufacturing process platforms, developing evaluation standards for artificial blood products, and funding clinical research	18
Omics-based Precision Medicine Technology Development	Development of technologies for identifying and predicting biomarkers related to intractable diseases by performing large-scale analysis of bio-information (omics) such as genomes and proteomes	45		Developing core technologies for microbiome-based treatment of intractable diseases and cancer to overcome the limitations and problems of existing treatments	50
Core Technology Development for New and Re-emerging Infectious Diseases Response Platform	Development of platform and core gap technologies in major areas (prediction-diagnosis-treatment-prevention) for responding to new and re-emerging infectious diseases	27		Advancing gene editing, control, and restoration technologies and developing delivery technologies to create next-generation core and fundamental gene therapy technologies	90
Core Technology Development Project for Next-Generation Infectious Disease Vaccines	Securing next-generation vaccine base technologies to proactively respond to infectious diseases	18

## 2024 Global Cooperation New Project Call for Proposals

Sub-Project (or Detailed-Project)	Project Overview	Number of new projects	Duration (Year)	Annual Research Budget (KRW 100 million, 12 months)	Starting Date
GloPID-R International Cooperation	Enhancement of the International Infectious Disease Cooperation Network based on GloPID-R and Strengthening Research Foundations for Overcoming Unresolved Future Infectious Diseases -Conduct international collaborative research in areas such as basic/mechanistic studies, diagnostics, therapeutics/vaccine development, surveillance/prediction, control measures, and policy development to respond to emerging and re-emerging infectious diseases	11	0.8	1.3 ~2	March
Strengthening Global Competence in Advanced Bio	o Establishment of a Sustainable Research Platform in Key Advanced Bio Technologies and Digital Bio Technologies : Use-Inspired Research Addressing Global Challenges through the Bioeconomy (NSF Lead Agency Model) o (Support for Inter-country Collaboration) Assistance in collaboration within the advanced bio sector across nations	Approximately 21	2 ~5	8 ~12	October
Digital Bio Promotion	Support for Boston-Korea Joint Research(Fostering technologies in advanced bio fields relevant to national strategic technologies through globally leading and pioneering international joint research between Korea and the United States, jointly by the Ministry of Science and ICT and the Ministry of Health and Welfare)	17	4	Type I : 30 Type II :20	July
Bio-Innovation Infrastructure Development	Support for Technology and Personnel Exchanges in Advanced Bio: Planning and operation of global cooperation programs -Overseas outreach (10 exchange research teams, approximately 60 participants) and domestic invitations (hosting distinguished international researchers)	1	7	55	April (Varies by Program)
Core Technology Development for Synthetic Biology	International Cooperation to Secure Leading Technologies in Biofoundries (International joint research, personnel exchanges, and hosting international conferences)	1	6	7.5	April

# 1. Biotechnology Development Program

## New Call for Projects in the First Half of 2024 (part of RFP list)

Detailed Project Name	Research Topic Name	Number of Selected Projects (Units)	Total Funding Duration	Total Research Funding per Project (Billion KRW)
Development of Core Synthetic Biology Technologies	[Protein (Enzyme)] Development of Core Fundamental Technology for Next-Generation Enzyme Design (Field 1: Development of de novo Artificial Enzyme Design Fundamental Technology)	1	2024-04-01~ 2028-12-31	9
Development of Core Synthetic Biology Technologies	[Circuit] Development of a Versatile Genetic Logic Circuit Device for Non-Model Useful Strains (Field 1: Development of a Versatile Genetic Logic Circuit Design/Manufacturing Platform for Non-Model Strains)	1	2024-04-01~ 2028-12-31	9
Development of Core Synthetic Biology Technologies	[Microbe] Development of Core Synthetic Biology Technology for the Advancement of Microbial Cell Factories (Field 1: Development and Advancement of Core Synthetic Biology Technology for Advanced Microbial Cell Factories, and Establishment of High-Level Chassis)	1	2024-04-01~ 2028-12-31	9
International Cooperation for Leading Synthetic Biology Technology Globally	International Cooperation for Securing Leading Bio-Foundry Technologies	1	2024-04-01~ 2028-12-31	5.62
Advanced GW Bio	Development of Retro-Biosynthesis Core Technology for Microbe/Plant-Derived Therapeutic Candidate Substances	1	2024-04-01~ 2028-12-31	15

# 1. Biotechnology Development Program

New Call for Projects in the First Half of 2024 (part of RFP list)

Detailed Project Name	Research Topic Name	Number of Selected Projects (Units)	Total Funding Duration	Total Research Funding per Project (Billion KRW)
Establishing a Bio-Innovation Foundation	Funding for Advanced Bio Technology and Talent Exchange	1	2024-04-01~2031-12-31	41.25
Next-Generation Bio	Establishment of Cloud AI Antibody Bank	1	2024-04-01~2026-12-31	50
Next-Generation Bio	Development of Core Fundamental Technology for Advanced Peptide New Drugs and Platform Construction	1	2024-04-01~2028-12-31	14
Development of Future Medical Innovation Response Technologies	Construction of a New Drug Design Platform Utilizing Large-Scale Facilities and Equipment	1	2024-04-01~2028-12-31	40

## III. Program Overview

17

# 2. Nano-Materials Technology Development Program

## Overview

### Program Overview

**(Purpose)** To identify and support **emerging fields in nanomaterials** and establish a strong research foundation. This includes providing comprehensive research and development support, from fundamental technology development to commercialization in the **nanomaterials** sector

**(2024 budget)** 35.3 billion KRW

**(Key Area)** Nanomaterials, material data, and nano infrastructure

### 2024 Focus Areas

Strengthen the strategic alignment of research and development policies and projects within the fields of nanomaterials, materials, and infrastructure to enhance the project's strategic value and outcomes through robust project management

**(Materials)** Enhance support for future materials R&D and provide robust backing for young researchers, in alignment with the 12 national strategic technologies; Secure next-generation fundamental technologies to address technical challenges and spearhead future advancements

**(Nanotechnology)** Allocate resources to acquire core technologies that maximize nanotechnology R&D capabilities, leveraging the excellent research outcomes accumulated based on the 4th Nanotechnology Roadmap

**(Research Infrastructure)** Develop a data-driven research innovation strategy and system (to be established in early 2024) to accelerate R&D; Establish research infrastructure for extreme materials essential for securing cutting-edge technologies

## III. Program Overview

18

## 2. Nano-Materials Technology Development Program

### Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget
Nano and Material Technology Development	Securing global-level fundamental technologies to create new markets and industries of the future and to upgrade key industries. Expanding related research infrastructure and promoting the commercialization of excellent outcomes	2,230
Funding for Future Material Discovery	Overcoming external dependence through the acquisition of future materials based on novel research methodologies and demonstration of core fundamental technologies in materials and components	109
Training of Professionals in the Nano-material Field	Cultivating specialized personnel in advanced nano-technology fields by utilizing experts from industry, academia, and research institutions as well as national nano-infrastructure	7
Establishment of a Verification Research Base for Extreme Materials	Establishing a one-stop demonstration foundation for extreme materials and funding demonstration research and development to secure national strategic sovereignty and technological leadership in extreme materials	8
<b>Total</b>		<b>2,354</b>

## 2. Nano-Materials Technology Development Program

### 2024 Global Cooperation New Project Call for Proposals

Sub-Project (or Detailed-Project)	Project Overview	Number of new projects	Duration (Year)	Annual Research Budget (KRW 100 million, 12 months)	Starting Date
Global Young Connect for Materials	Support emerging researchers in national strategic technology areas of future materials to overcome technological challenges, develop leadership, and form global networks	16	4 (2+2)	Phase I 7.5, Phase II 15	April, July

### III. Program Overview

20

## 2. Nano-Materials Technology Development Program

New Call for Projects in the First Half of 2024 (part of RFP list)

Detailed Project Name	Research Topic Name	Number of Selected Projects (Units)	Total Funding Duration	Total Research Funding per Project (Billion KRW)
National Strategic Technology Material Development	Development of Conductive Material Technology for Semiconductor High Directivity Wiring and Heterogeneous Integration/2.5, 3D IC	1	2024.04.01~2028.12.31	71.25
	Graded Functional Materials for Integrated Regeneration of Hard-Soft Tissue Interfaces	1	2024.04.01~2028.12.31	71.25
	Development of Stretchable Backplane Fundamental Materials and Process Technology with Intrinsic Stretchability under 30% or More Biaxial Tension for Stretchable Displays	1	2024.04.01~2028.12.31	71.25
	High-Energy-Density Lithium-Ion Battery Electrode Material for Low-Carbon Dry Process	1	2024.04.01~2028.12.31	71.25
	Single-Crystal Cathode Material for Electric Vehicles Based on Direct Recycling Technology of Spent Batteries	1	2024.04.01~2028.12.31	71.25

### III. Program Overview

21

## 2. Nano-Materials Technology Development Program

New Call for Projects in the First Half of 2024 (part of RFP list)

Detailed Project Name	Research Topic Name	Number of Selected Projects (Units)	Total Funding Duration	Total Research Funding per Project (Billion KRW)
Development of Core Technology for Nano-Future Materials	High-Precision Large-Area Terahertz Nano-Sensor Technology Overcoming Wavelength Limits	2	2024.04.01~2028.12.31	38.75
	Development of High-Stretchability Sensing In-Memory Devices and Artificial Neural Systems for Robotics Applications	2	2024.04.01~2028.12.31	38.75
	Development of Natural-Based High-Functionality Lignocellulosic Nano-Materials and Commercialization Process Technology	2	2024.04.01~2028.12.31	38.75
Technology Development	Development of Ultra-Sensitive Nano-Optical Materials for Non-Destructive Structural Analysis of Multidimensional Proteins	1	2024.04.01~2028.12.31	95.00
	Development of Ultra-Lightweight, Low-Cost Metal-Polymer Hybrid Mobility Materials and Component Technology Based on Covalent Bonding	1	2024.04.01~2028.12.31	95.00
	Development of Multifunctional Mat and Tubular Therapeutic Materials Based on Extracellular Matrix Nano-Fibers	1	2024.04.01~2028.12.31	95.00

### III. Program Overview

22

# 3. ICT Fundamental R&D Program

## Overview

### Program Overview

**(Purpose)** To secure technological superiority in the fields of semiconductors, displays, secondary batteries, ultra-high-performance computing, and superconductors, and to expand investment in promising fundamental technologies to create future growth opportunities

**(2024 Budget)** 132.4 billion KRW

**(Key Area)** Semiconductors, displays, secondary batteries, ultra-high-performance computing, and superconductors

### 2024 Focus Areas

**(Semiconductors)** Continue supporting the development of next-generation fundamental technologies in promising areas such as intelligent semiconductors, PIM semiconductors, and compound semiconductors; **Engage in long-term, in-depth R&D and train master's and doctoral-level experts in system semiconductors**

**(Displays)** Support strategic research labs to develop **future display** fundamental technologies, including ultra-realistic (ultra-high resolution, holograms, etc.), **next-generation free-form, and convergence technologies**; **Launch new projects for developing core technologies for ultra-high-resolution displays on silicon wafer substrates (on-silicon displays)**

**(Secondary Batteries)** Promote new projects for the development of **next-generation core fundamental technologies for secondary batteries**, focusing on materials independence (sodium-ion batteries) and safety assurance (aqueous zinc batteries); Engage in **international cooperation** through joint research with institutions such as the **U.S. Argonne National Laboratory**, and **train master's and doctoral-level experts in next-generation secondary batteries** to meet increasing private sector demand

**(Ultra-High-Performance Computing)** Accelerate the introduction of national ultra-high-performance computing infrastructure to reach the level of global top ten countries; Maximize the utilization of ultra-high-performance computing in strategic areas and provide phased support for software development in preparation for the exascale era

**(Superconductors)** Promote the acquisition of core technologies for non-insulated high-temperature superconductors and the design and production of prototypes for magnets in four key shapes\*

\* Four key shapes of magnets (promising application areas) include Solenoid (MRI), D-shaped toroidal (environment and energy), racetrack (electric vehicles and railways), and saddle-shaped (cancer treatment accelerators).

# 3. ICT Fundamental R&D Program

## Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget	Project Name	Purpose of the Project	'24 Budget
Core Technology Development for PIM Artificial Intelligence Semiconductors	Securing technological superiority in new concept PIM artificial intelligence semiconductors and establishing an industrial ecosystem to achieve global technological and market dominance	113	Training of Convergence Experts in System Semiconductors	Training high-level convergence experts * Cultivating talent to pioneer future markets and enhance industrial competitiveness	95
	Supporting the development of fundamental technologies for next-generation compound semiconductor epi-materials and devices to foster a research ecosystem and stimulate industry	79		* 'T-shaped professionals' who possess a comprehensive understanding of the entire semiconductor domain, including devices, circuits, systems, design, and manufacturing (↑ expertise), and who can creatively integrate knowledge in interdisciplinary fields such as AI and bio-technology where semiconductors are utilized (↑ convergence skills).	
Core Technology Development for Supporting National Semiconductor Research Labs	Enhancing the capabilities of university semiconductor labs, which are the basic units of research and development and human resource training, to respond to the intensifying global competition for semiconductor technological supremacy	89			
Activation of Semiconductor Design and Verification Infrastructure	Providing MyChip services using public fabs to undergraduate and graduate students in the semiconductor design field, and promoting equipment advancement and fab linkage	60	Fab Advancement (Detailed Project under Nano-Material Technology Development)	Supporting the expansion of national nano-infrastructure facilities, equipment, and services, including nano-fabs	175

### 3. ICT Fundamental R&D Program

#### Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget	Project Name	Purpose of the Project	'24 Budget
Core Technology Development for Advanced Semiconductor Packaging	Enhancing the competitiveness of foundries and OSAT by training master's and doctoral-level experts in advanced packaging, following the advancement of semiconductor back-end processes	64	International Cooperation for Fundamental Technology Development (Semiconductors)	Identifying and supporting cooperation projects for fundamental technology development to secure technological superiority in the three key areas (semiconductors, displays, secondary batteries) and establishing a global cooperation network	44
Development of Micro-Substrate Technologies for Next-Generation Semiconductors	Securing core technologies for next-generation advanced substrates to expand the market share and technological dominance of domestic companies in semiconductor package substrates	64	Training of Specialized Personnel in Advanced Semiconductor Packaging	Supporting the training of master's and doctoral -level experts in advanced packaging following the enhancement of semiconductor back -end processes to strengthen the competitiveness of foundries and OSAT	6
Core Technology Development for Next-Generation Semiconductor Equipment	Strengthening research and industrial competitiveness by developing fundamental technologies for next-generation semiconductor equipment through innovative processes in advanced semiconductor manufacturing	25	Support for Strategic Research Labs in Future Displays	Supporting fundamental research by mid - career researchers in strategic areas for future display technological superiority, based on private sector demand, to produce research outcomes	31
Utilization Projects Linked to Global Advanced Semiconductor Fabs	Promoting international joint research and development through collaboration between domestic and international research institutions possessing leading nano-semiconductor and application technologies and advanced semiconductor infrastructure institutions	25	Development of Core Future Technologies for On -Silicon Displays	Preemptively securing on -silicon* display technology utilizing semiconductor+display convergence infrastructure to maintain technological superiority in the display field Development of core fundamental technology for implementing ultra -high -resolution self -emissive displays of 6,000 ppi or more on silicon wafer substrates (on -silicon)	33

#### New Call for Projects in the First Half of 2024 (part of RFP list)

Detailed Project Name	Research Topic Name	Number of Selected Projects (Units)	Total Funding Duration	Total Research Funding per Project (Billion KRW)
High-Efficiency/Fine-Pitch Packaging Manufacturing Technology	Development of Core Technology for High-Efficiency Fine-Pitch Packaging Manufacturing	1	2024-05-01~2029-01-31	14.22
	Development of Core Technology for Ultra-High-Density Hybrid Bonding in High-Performance Semiconductors	1	2024-04-01~2028-12-31	14.22
High-Thermal-Conductivity Packaging Design and Reliability Technology	Reliability Diagnosis and Thermal Design Technology for Next-Generation Semiconductor Packaging	1	2024-04-01~2028-12-31	8.5
Development of Micro-Substrate Technology for Next-Generation Semiconductors	Development of Core Technologies for Polymer Interposer Materials and Processes for Advanced 2.xD Packaging	1	2024-05-01~2029-01-31	12.00
	Development of Vertical Stacking Micro-Substrates (2μm x 2μm) for Next-Generation 2.1D Semiconductor Packaging	1	2024-04-01~2028-12-31	12.00
Development of Core Front-Plane Technology for On-Silicon Displays	Self-Emissive Front-Plane Technology Capable of 6,000 ppi Resolution	1	2024-04-01~2028-12-31	15

### 3. ICT Fundamental R&D Program

#### New Call for Projects in the First Half of 2024 (part of RFP list)

Detailed Project Name	Research Topic Name	Number of Selected Projects (Units)	Total Funding Duration	Total Research Funding per Project (Billion KRW)
Development of Core Front-Plane Technology for On-Silicon Displays	Self-Emissive Front-Plane Technology Capable of 6,000 ppi Resolution	1	2024-04-01~ 2028-12-31	18
Development of Core Technology for Next-Generation Semiconductor Equipment	Development of Core Technology for Large-Area High-Depth MI-SEM Metrology and Inspection Equipment (2024-Semiconductor-13)	1	2024-05-01~ 2029-01-31	25

### 4. Quantum Science and Technology R&D Program

#### Overview

##### Program Overview

**(Purpose)** To strengthen technological competitiveness through the development of core and fundamental technologies in the quantum science and technology and system implementation

**(’24 Budget)** 128.5 billion KRW

**(Key Area)** Quantum computing, quantum communication, and quantum sensors

##### 2024 Focus Areas

**(Technology Development)** Accelerate technological advancement through the promotion of interdisciplinary research in science and engineering

**(Infrastructure Expansion)** Enhance R&D efficiency and strengthen the ecosystem in the quantum field by developing quantum materials and components, and establishing a central hub for international cooperation in Asia

**(Expansion of Technology Application)** Promote the technology application in quantum computing by advancing the development of quantum simulators for materials innovation and expanding support for advanced quantum research

## 4. Quantum Science and Technology R&D Program

### Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget	Project Name	Purpose of the Project	'24 Budget
Quantum Computing Technology Development	Strengthening technological competitiveness through the development of core and fundamental technologies in the field of quantum computing, which is being recognized as the technology of dreams	16	Quantum Computing-Driven Quantum Advantage Research	Supporting the entire process from technology development to demonstration based on the demand for quantum computing applications in industry, defense, public, and social sectors to build a quantum ecosystem and secure market leadership	65
Leading Research and Development in Quantum Technology (Quantum Computing)	Enhancing key technologies in quantum computing and developing next-generation innovative technologies through leading-edge research to strengthen technological competitiveness	83	Advancing Quantum Cryptography Communication Integration and Transmission Technology	Securing key fundamental technologies for quantum cryptographic communication, including the integration of communication chips, improvement of transmission efficiency, and guarantee of interoperability	67
Establishing Quantum Computing Research Infrastructure	Building and operating a globally competitive quantum computing system to foster domestic quantum computing research	150	Developing Core Technologies for Quantum Internet		86
Developing Quantum Simulators for Material Innovation	Developing a quantum simulator platform specialized in the research of new materials for the production, storage, and utilization of hydrogen to innovate material development and expand the use of quantum computing	93	Expanding Quantum Cryptography Communication Industry and Developing Next-Generation Technologies	Promoting the industrial dissemination of quantum cryptographic communication and securing global technological competitiveness through the development of next-generation quantum cryptographic communication technologies	49

Quantum Computing-Based Quantum Advantage Challenge Research	Quantum Computing-Based Quantum Advantage Challenge Research	2	2024.04.01~2026.12.31	27.50
Developing Common Quantum Fundamental Technologies	Development of Cryogenic Refrigerators for Quantum Devices	1	2024.05.01~2029.01.31	80.00
	Development of Semiconductor Laser Light Sources and Modules for Quantum Technology	1	2024.05.01~2029.01.31	80.00

## 5. Convergence Technology Development Program

### Overview

#### Program Overview

**(Purpose)** To secure global-level fundamental technologies for convergence to lead future technological revolutions and create new national growth engines, while promoting the commercialization of outstanding outcomes

**(2024 Budget)** 100.051 billion KRW

**(Key Area)** Convergence research and training of technology convergence experts

#### 2024 Focus Areas

**(Collaborative Planning based on Openness)** Identify emerging fundamental technologies in the field of technology convergence through a continuous communication system with over 50 academic federations\*, and expand research creativity through problem-solving and goal-oriented planning

\* Major technological fields under the Ministry of Science and ICT: General, electronics and information, biotechnology, materials/convergence technology, large-scale/public technology, quantum technology and basic research

**(Future-Oriented Portfolio Projects)** Enhance the efficiency of R&D investment in convergence technologies by promoting portfolio-type convergence projects that provide various options in a rapidly changing environment

# 5. Convergence Technology Development Program

## Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget
STEAM Research	Creating new growth engines based on convergence technologies that will lead the 21st-century technological revolution, and promoting utilization and development in various sectors through the convergence of science and ICT technologies	882
Training Convergence Experts in Data Science	Training convergence experts by integrating the core of data science with various promising fields of science, technology, and humanities and social sciences (selection and support of educational institutions)	106
Human Plus Convergence R&D Challenge	Developing basic fundamental technologies and securing convergence platform technologies through the cultivation of small and medium-sized convergence research groups focused on human augmentation for the development of advanced convergence fundamental technologies and the creation of high-profit new industries	6
Traditional Culture Innovation and Growth Convergence Research	Developing and establishing a support system for fundamental technologies to enhance and popularize traditional cultural products	6

Detailed Project Name	Research Topic Name	Number of Selected Projects (Units)	Total Funding Duration	Total Research Funding per Project (Billion KRW)
Global Convergence Research Funding	Global RFP-1. Development of flexible nanomesh neuroprosthetic technology based on brain-machine interfaces for long-term post-transplant use (Humanity)	1	2024.04.01~2024.06.30	0.50
	Global RFP-2. Research on AI-based digital healthcare systems to overcome hearing loss and cognitive impairment	2	2024.04.01~2024.06.30	0.50
	Global RFP-3. Development of a humanoid avatar robot with a multisensory sensing system and remote operation interface	2	2024.04.01~2024.06.30	0.50

### III. Program Overview

40

## Overview

### Program Overview

**(Purpose)** To address the climate change crisis by securing world-leading fundamental technologies and supporting the creation of innovative growth engines in technology fields with significant greenhouse gas reduction effects

**(2024 Budget)** 10.938 billion KRW

**(Key Area)** Solar cells, fuel cells, and bioenergy

### 2024 Focus Areas

**(Solar Cells)** Develop climate industry models suitable for commercialization, such as urban and mobile solar cells, and support the advancement of next-generation solar cell fundamental technologies based on these models

**(Fuel Cells)** Develop climate industry models suitable for high energy consumption areas, such as solid oxide fuel cells (SOFC), and support the advancement of next-generation fuel cell fundamental technologies

**(Bioenergy)** Facilitate the acquisition of unused and new biomass and the development of complex conversion and utilization technologies to transform biomass into fuel, thereby overcoming the limitations of existing technologies

**(C1 Gas Refinery)** Support the development of core fundamental technologies for bio-catalysts and chemical catalysts for the conversion of C1 gases (CO, CH<sub>4</sub>) and the development of refinery technologies

## Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget
Solar Cells	Supporting the acquisition of innovative fundamental technologies and the creation of future growth engines in the fields of greenhouse gas reduction, resource utilization, and climate change adaptation in response to the climate change crisis	20
Fuel Cells	Supporting the acquisition of innovative fundamental technologies and the creation of future growth engines in the fields of greenhouse gas reduction, resource utilization, and climate change adaptation in response to the climate change crisis	40
Bioenergy	Supporting the acquisition of innovative fundamental technologies and the creation of future growth engines in the fields of greenhouse gas reduction, resource utilization, and climate change adaptation in response to the climate change crisis	35
C1 Gas Refinery	Supporting the acquisition of innovative fundamental technologies and the creation of future growth engines in the fields of greenhouse gas reduction, resource utilization, and climate change adaptation in response to the climate change crisis	14
<b>Total</b>		<b>109</b>

## 6. Climate Environment R&D Program

### 2024 Global Cooperation New Project Call for Proposals

Sub-Project (or Detailed-Project)		Project Overview	Number of new projects	Duration (Year)	Annual Res earch Budg et (KRW 100 million, 12 months)	Starting Date
Climate Technology	Facilitating International Cooperation in Climate Technology (CTCN Technology Support)	As the national focal point for the UNFCCC technology support system, strengthen the cooperation base for climate technology, promote climate technology development, and facilitate overseas expansion through international cooperation	1	1	1.6	April
Secondary Batteries	International Cooperation in Fundamental Technology (Joint Research on Secondary Batteries)	Identify and support foundational technology development cooperation projects to secure an overwhelming lead in the three major technologies (semiconductors, displays, secondary batteries) , and establish a global cooperation network	4	5	12	July

### III. Program Overview

43

## 6. Climate Environment R&D Program

### New Call for Projects in the First Half of 2024 (part of RFP list)

Detailed Project Name	Research Topic Name	Number of Selected Projects (Units)	Total Funding Duration	Total Research Funding per Project (Billion KRW)
CTCN Technical Support	CTCN Technical Support	1	2024-03-01~ 2025-02-28	1.6
Development of Core Fundamental Technologies for Breakthrough Next- Generation Secondary Batteries (R&D)	Development of Fundamental Technology for High-Performance Next-Generation Aqueous Zinc Batteries (120Wh/kg)	1	2024-04-01~ 2028-12-31	15.5
	Development of High-Performance Core Materials and Cell Technology for Sodium-Ion Batteries (220Wh/kg)	1	2024-04-01~ 2028-12-31	19.5
International Joint Research on Secondary Batteries	International Joint Research on Secondary Batteries	4	2024-05-01~ 2028-12-31	6

### III. Program Overview

44

# 7. Nuclear R&D Program

## Overview

### Program Overview

**(Purpose)** To promote nuclear and radiation research and development that prioritizes public safety while driving future innovative growth

**(2024 Budget)** 256 billion KRW

**(Key Area)** Core nuclear technologies and radiation utilization technologies

### 2024 Focus Areas

**(Core Nuclear Technologies)** Support the development of reactors emphasizing safety, economic efficiency, and flexibility, including the development of innovative small modular reactors (e.g., i-SMR), key technologies for enhancing the safety of operating nuclear power plants, and core technologies focused on public safety and life

**(Radiation Utilization Technologies)** Leverage radiation capabilities to validate medical and industrial technologies and pursue the acquisition of convergence and fundamental technologies for creating new industries

**(Research Infrastructure Development)** Strengthen the nuclear research infrastructure through basic research, human resource development, facility construction, and international cooperation to secure innovative momentum in nuclear R&D

# 7. Nuclear R&D Program

## Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget	Project Name	Purpose of the Project	'24 Budget
Nuclear Safety Research Professional Manpower Development Project	Training next-generation safety research professionals to address issues and meet the technological development needs in nuclear safety fields such as nuclear safety technology, nuclear decommissioning technology, and nuclear fuel cycle element technology	39	Future Nuclear Technology Facility Equipment Construction and Utilization Project	Supporting the construction and advancement of nuclear research facilities and advanced educational/research equipment, and fostering research personnel in future nuclear technology fields to strengthen research and development capabilities	30
Basic Nuclear Research Support Project	Establishing a stable research environment by identifying and supporting creative and challenging ideas, and building a research foundation that can solve various societal issues and pave the way for next-generation technological breakthroughs using fundamental nuclear technologies	59	Core Technology Development Project for Ensuring the Safety of Spent Nuclear Fuel Storage and Disposal	Securing core solutions for the storage and disposal of spent nuclear fuel before the demonstration phase in underground research facilities (URL*) and establishing a management foundation <small>* Underground Research Laboratory (URL): A research facility that demonstrates the safe performance of disposal systems in a subterranean environment similar to actual disposal conditions</small>	194
Core Element Technology Development Project for Advanced Future Reactors	Developing core element technologies for non-light water advanced reactors based on 4th generation reactors that can be utilized in various future energy sources (distributed power, heat supply, hydrogen production, etc.)	66	Custom Verification Technology Development Project for Future Advanced Reactors for Overseas Markets	Building a technical foundation and enhancing technical capabilities to enter new markets with innovative nuclear systems based on 4th generation small modular reactors	60
Research Reactor System Export Support and Enhancement Project	Developing unacquired element technologies and enhancing core technologies necessary for strengthening the export competitiveness of research reactor systems	4	Next-Generation Innovative Technology Development Project for High-Level Waste Management	Developing innovative and eco-friendly next-generation high-level waste management technologies that can reduce disposal areas and enhance disposal safety	65

# 7. Nuclear R&D Program

## Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget	Project Name	Purpose of the Project	'24 Budget
Nuclear Safety Technology Demonstration Project Utilizing Equipment/Facilities from Gori Unit 1	Demonstrating and advancing nuclear safety technologies using equipment and facilities from Gori Unit 1, which has been operational for 40 years	20	Heavy Water Reactor Safety Management Technology Development Project	Securing safety solutions applicable during the operational period of heavy water reactors (safety diagnostics, fault prevention) and enhancing safety management technologies for spent fuel storage pools after permanent shutdown	3
Core Technology Development and Demonstration Project for Exporting Research Reactor Plate-Type Fuel	Securing a foundation for exporting research reactor fuels overseas by developing and internationally verifying core technologies for high-density plate-type nuclear fuel using world-class centrifugal spray powder technology	37	Advanced R&D Project for Spent Nuclear Fuel Processing Technology	Securing and advancing gap fundamental technologies to ensure long-term consent and establish a demonstration foundation for spent nuclear fuel processing technologies (pyro-SFR)	68
Core Technology Development Project for Enhancing the Safety of Operating Nuclear Power Plants	Ensuring long-term operational safety at a level that reassures the public by integrating advanced technologies and safety innovations to address increasing risks such as climate change	286	Innovative Small Modular Reactor (i-SMR) Technology Development Project	Developing core technologies for innovative SMRs with the safety, economic efficiency, and flexibility required in the global SMR* market in the 2030s, and completing standard design and technical verification by 2028	274
Fusion Core Technology Development Project for Enhancing Nuclear Decommissioning Safety	Securing superior technologies that can compete with foreign companies in the domestic and international nuclear decommissioning markets, and obtaining advanced fundamental technologies focused on human and environmental safety that can significantly improve safety compared to existing commercial nuclear decommissioning technologies	10	Technology Development Project for Strengthening Nuclear Decommissioning Competitiveness	Securing practical and verification technologies and infrastructure necessary for domestic nuclear decommissioning applications, and developing leading nuclear decommissioning technologies considering the latest unresolved issues from previous projects	30

### III. Program Overview

47

# 7. Nuclear R&D Program

## Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget	Project Name	Purpose of the Project	'24 Budget
Core Technology Development for Reducing Spent Nuclear Fuel Generation in Small Modular Reactors	Developing core technologies for core design, nuclear fuel/metal reflector materials and components, and producing and testing prototypes, and developing performance and safety evaluation technologies to reduce spent nuclear fuel generation in light water small modular reactors	10	Future Innovation Fundamental Technology Research Utilizing Radiation	Supporting goal-oriented research that tackles technological challenges in various fields such as space, nano, and life sciences using radiation technologies (analysis/irradiation)	6
Korea Research Foundation Planning, Evaluation, and Management Costs (Basic Fund)	Project management costs	45	Core Technology Development Project for Responding to Rare and Intractable Diseases Using Radiation	Supporting the development of core technologies (diagnosis, treatment, prevention, evaluation) that can overcome unresolved rare and intractable diseases using radiation	22
Radiation Research Infrastructure Expansion Project	Expanding and activating the national research foundation for radiation utilization by establishing related equipment such as test and performance evaluation facilities in the radiation field, linking technical information networks, and fostering professional manpower	64	Technology Development Project for Reducing Waste Plastics Using Radiation	Developing raw materials for biodegradable plastics and securing technologies for biodegradation and risk assessment of waste plastics using radiation technologies (decomposition/conversion)	4
Next-Generation Non-Destructive Inspection Technology Development Project Based on Data Science	Building a non-destructive testing infrastructure and developing essential technologies for solution development using data-based intelligent inspection solutions	5	Quality Management and Advanced Verification System Project for Radiation Devices	Developing performance evaluation technology standards and precision measurement/standardization technologies for radiation medical devices that comply with international standards, and developing specialized educational programs utilizing established radiation infrastructure	11
Industrial Promotion and Advanced Technology Support Project for Radioisotopes	Providing technical support and establishing an industrial promotion system for the production, utilization, and commercialization of radioisotopes	33	Molten Salt Reactor (MSR) Fundamental Technology Development Project	Securing core fundamental technologies for molten salt reactors suitable for carbon marine systems (ship propulsion, floating nuclear power plants, offshore plants, etc.)	68

### III. Program Overview

48

# 7. Nuclear R&D Program

## Detailed Project Status

(Unit: Billion KRW)

Project Name	Purpose of the Project	'24 Budget	Project Name	Purpose of the Project	'24 Budget
<b>Commercialization Technology Development Project for Isotopes Produced by New Export Research Reactors</b>	Achieving stable domestic supply and export industrialization by developing commercialization and mass production technologies for high -demand medical and industrial isotopes produced by new export research reactors	11	<b>SMART Innovation Technology Development Project</b>	Securing leading technologies and strengthening global market competitiveness by developing innovative technologies to enhance the economic efficiency and safety capabilities of small modular reactors (SMART)	18
<b>Public-Private Partnership Next-Generation Reactor Development Project</b>	Developing basic and comprehensive plant designs for high -temperature gas reactors for process heat supply and supporting technology transfer to the private sector through public -private partnerships	60		<b>International Joint Research Funding Project for Nuclear Energy</b>	Acquiring advanced nuclear technologies and establishing a foundation for domestic nuclear export through international joint research with advanced and emerging nuclear countries
<b>Funding for Radiation Convergence Industries</b>	Creating new markets and promoting overseas expansion by supporting the entire cycle of commercialization (advancement, certification, productization) of outstanding and promising technologies using key national radiation investment resources (R&D outcomes, infrastructure, etc.)	15	<b>IAEA Technical Cooperation Contribution</b>	Paying special contributions to the IAEA (International Atomic Energy Agency) for technical cooperation, including human resource training and technology development support for developing countries	15
<b>Next-Generation Nuclear Professional Manpower Development Project (Details)</b>	Fostering next-generation nuclear and convergence professionals to meet private sector demand through the influx of outstanding talent into the nuclear field	9	<b>Development and Demonstration Project for New Export Research Reactors</b>	Strengthening research reactor export capabilities and meeting domestic demand for medical and industrial radioisotopes through the domestic demonstration of new research reactor technologies	632
<b>Nuclear International Cooperation Foundation Project</b>	Strengthening strategic bilateral/multilateral international cooperation to secure core future nuclear technologies and establish a foundation for the overseas expansion of nuclear technology	69		<b>Heavy Ion Accelerator Construction Support Project</b>	Improving the survival rate of patients with intractable cancers by constructing a medical heavy ion accelerator
<b>Total</b>					<b>2,560</b>

# 7. Nuclear R&D Program

## New Call for Projects in the First Half of 2024 (part of RFP list)

Detailed Project Name	Research Topic Name	Number of Selected Projects (Units)	Total Funding Duration	Total Research Funding per Project (Billion KRW)
Next-Generation Nuclear Professional Manpower Development Project	Next-Generation Nuclear Professional Manpower Development Center	1	2024.05.01~2028.12.31	65.00
Facility and Equipment Construction and Modernization	Establishment of VEST Modernization and Joint Utilization System	1	2024.04.01~2026.12.31	13.00
Human Resource Development and Joint Utilization System Establishment	Establishment of Joint Utilization System for Single Crystal Quantum Material Measurement Using Radiation Measurement Technology	1	2024.04.01~2026.12.31	13.00
Next-Generation Nuclear Policy Center	Next-Generation Nuclear Policy Center	1	2024.04.01~2027.12.31	40.00
Development of Core Technologies for Reducing Spent Nuclear Fuel Generation in Small Modular Reactors	Development of Advanced Analysis and Core Evaluation Fundamental Technologies for LEU+ATF Loaded SMR Nuclear Fuel	1	2024.04.01~2028.12.31	70.00
	Development of Core Technologies for LEU+ATF Nuclear Fuel and Core Application	1	2024.04.01~2028.12.31	170.00
Development of Leading Technologies for Enhanced Safety in Nuclear Decommissioning	Development of Physical and Chemical Separation, Volume Reduction, and Stabilization Technologies for Special Waste from Heavy Water Reactor Decommissioning	1	2024.04.01~2029.12.31	70.00

### III. Program Overview

# IV

## Evaluation Procedure

## Expert Evaluation

- Evaluation committee is made up about 10 members who are chosen from a NRF database (pool of reviewers) through a process conducted fairly and impartially by the RB/PM (ad-hoc base)
  - Only persons with appropriate expertise and without disqualifying conflict of interest can be appointed
- The evaluation is to be conducted by Oral presentation In Person
  - Applicants are informed of the details of the evaluation method after the evaluation plan is established based on the project scale and the number of applications received

## Key Evaluation Criteria

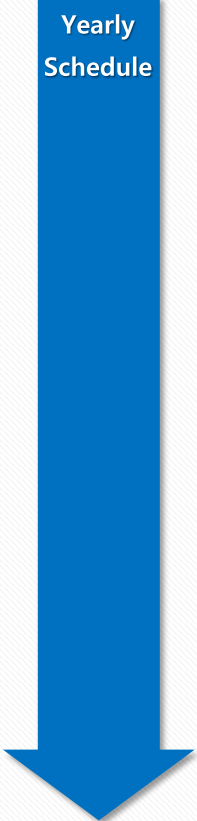

Evaluation Criteria	Details	Score
Research Plan (35)	Creativity and innovativeness of the R&D projects based on their suitability to the social and industrial needs - Assessment of the differentiation from the existing National R&D Projects	20
	Feasibility of the research plan - Compliance with the call for the project including the RFP and research topic guides) - Clarity of research objectives - Adequacy of research contents and implementation framework	15
Research Capability (25)	Research experience and achievements of applicants from the lead and collaborative research institutes - Suitability for the research contents - Capability to smoothly implement the project	25
Application of research findings (40)	Possibility of securing originative source technologies and expected impacts - Specificity and feasibility of the plan to secure originative source technologies - Applicability of research outcomes and their impacts on the scientific community, the public, and the industry sector	20
	Appropriateness of a strategy to produce tangible outcomes - A strategy for securing intellectual property rights and a roadmap for technology transfer and commercialization	20
Total		100

# Yearly Schedule

## Yearly Schedule

Yearly  
Schedule

### 1. New Project Planning and RFP Announcement (January - February)

- The RFP announcements are uploaded on the National R&D Project Integrated Information System (IRIS) or the NRF website for a duration of 30 days or more.
- The RFPs include the project objectives, funding details and durations, eligibility criteria, selection evaluation criteria and procedures, confidentiality, and other matters as determined by the minister.

### 2. Selection Evaluation (February - March)

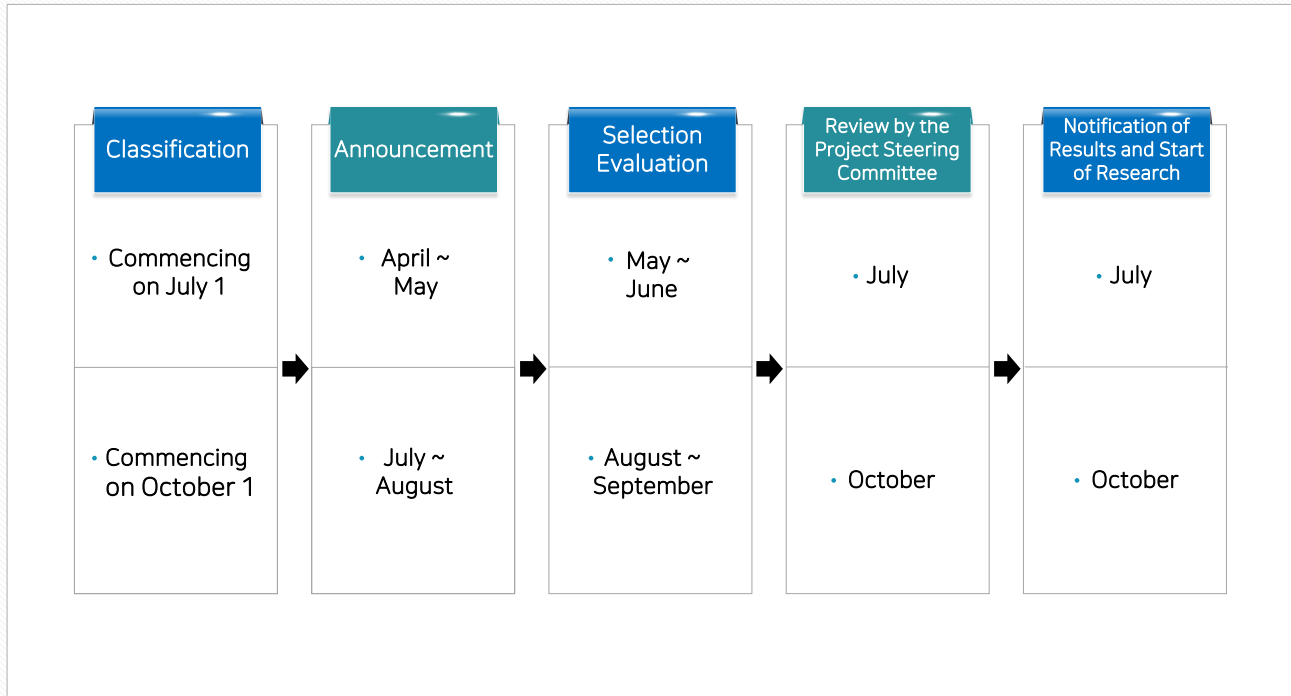

- Procedure: Preliminary Review by specialized agencies → Expert Evaluation → Main Review by specialized agencies
- During the expert evaluation, applicants present their research plans and participate in Q&A sessions.

### 3. Project Steering Committee Review (April)

- The committee adjusts the selected projects and their funding size by examining the review results (including the overall evaluation comments) submitted by the specialized agencies.

### 4. Notification of Evaluation Results and Project Kick-off (April)

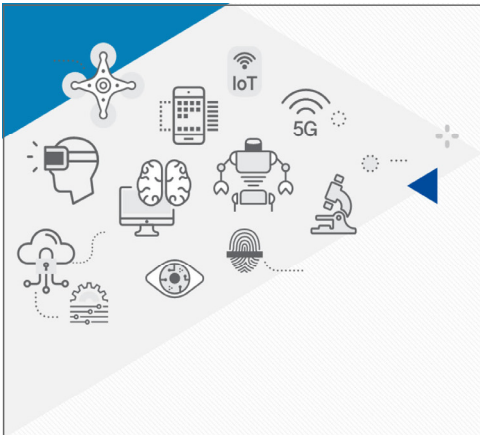

- Evaluation results, including the overall evaluation comments and the list of evaluators, are communicated to the applicants' institutions and PMs.

# Thank you

# Thank you

## International Cooperation Programs

1. Introduction of Directorate

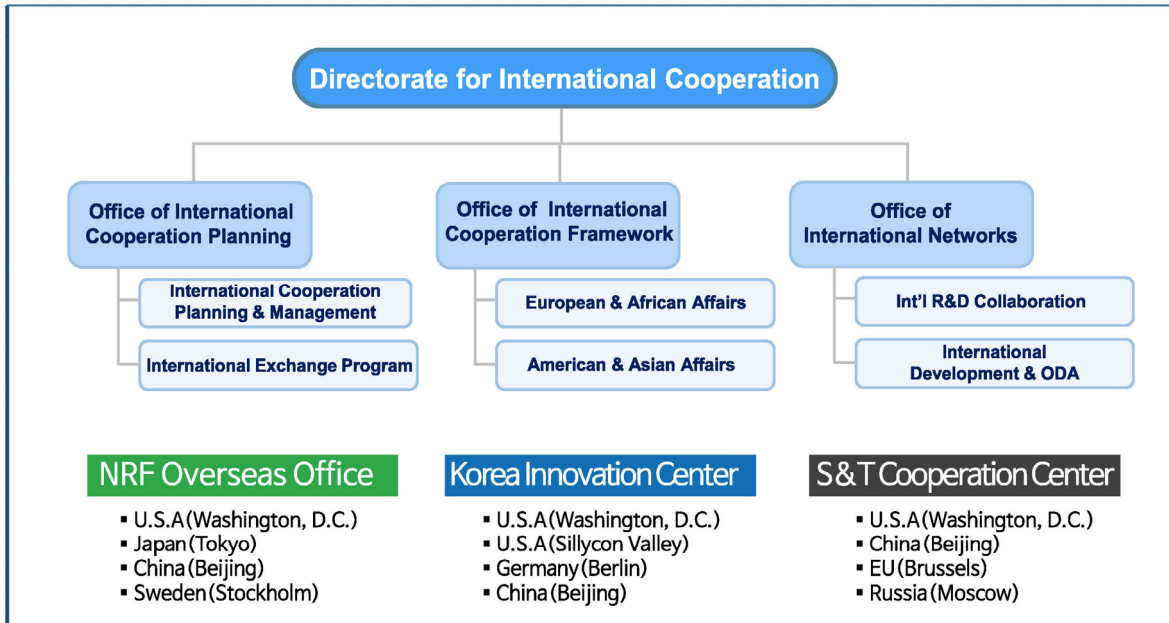

2. Major Programs

3. Review Process

01

**Introduction of Directorate**

DIA aims to strengthen international cooperation with overseas partners by facilitating joint research, academic meetings, and researcher exchanges, as well as supporting sustainable and mutually beneficial collaboration programs.

- Enhance the quality research through global S&T cooperation network
- Conduct bi/multi-lateral cooperation for mutual benefits
- Join the global efforts to address global challenges and improve knowledge transfer through ODA programs
- Contribute to Science diplomacy and support the global market activities of SMEs & start-ups

# Category of International Cooperation Programs

Category	Programs
Joint Research & Mobility Programs	<ul style="list-style-type: none"> <li>- Global Research Development Center</li> <li>- Strategic Joint Research Program</li> <li>- Brain Pool</li> <li>- Cooperation with International Organizations, etc</li> </ul>
Bi/multi-lateral Cooperation Programs	<ul style="list-style-type: none"> <li>- Joint Research Projects</li> <li>- Conference/forum</li> <li>- Exchange of researchers</li> <li>- Oversea S&amp;T Cooperation Centers, etc</li> </ul>
ODA Programs	<ul style="list-style-type: none"> <li>- Global Education Support Programs</li> <li>- Techno Peace Corps Program, etc</li> </ul>
Support SMEs & Start-ups	Korea Innovation Centers, etc

# Programs by Collaboration Stages

The NRF offers a variety of international programs in different funding levels.

### Beginning

- Short Research Visits Overseas
- Summer Program for Graduate Students
- Post-doc training abroad program
- Young scientists training program

### Developing

- Bi/multi-lateral Joint Research Programs
- Global research network
- Cooperative development programs

### Networking

- NRF joint seminars/workshops
- R&D Network program
- NRF International Mobility

### Maturing

- Global Top-tier Joint Research Program
- Global Research Development Center
- Key Joint Research Program (China)
- A3 foresight program

# International Partnership of NRF

NRF has exchanged MOU with 83 agencies in 51 countries.

## Europe

(44 agencies in 24 countries)

AF, AHRC, ANR, AvH, BBSRC, BC, BRFFR, CAS, CNR, CNRS, CSIS, DAAD, DFG, ESRC, FNRS, FORTH, FWF, FWO-Vlaanderen, GACR, HAE, HAS, IFD, IVA, MPG, MRC, NASU, NKFIH, NOW, PAN, RA, RAS, RCN, RFBR, RS, SAS, SINTEF, SKOLKOVO, SNSF, SSF, STINT, TUBITAK, UKRI, VR

## Asia

(19 agencies in 12 countries)

MOST, MAS, NCSH, VAST, BRC, SCST, ICSSR, INSA, LIPI, JSPS, JST, CAS, NSFC, CASS, CSTEC, NRCT, NAST, NRCP, A\*STAR

## America

(8 agencies in 6 countries)

NSF, NSERC, Mitacs, CONACYT, CONICYT, CONICET, CNPq, FAPESP

## Middle East and Africa

(8 agencies in 7 countries)

ASRT, STDF, UNCST, ScienceFund, COSTECH, CNRST, NRF, QNRF

## Oceania

(4 agencies in 2 countries)

AAS, ARC, ATSE, RSNZ

02

# Major Programs

## Global Matching Joint Research Program - Germany(New)

***To strengthen bilateral research collaborations with a win-win approach, supporting sustainable and mutually beneficial partnerships among outstanding scientists between Korea and Germany***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
  - ※ PIs in basic research programs of NRF are allowed to take part in the program
- Research Fields : Natural, Life and Engineering Sciences
- Funding : 3 years / KRW 150 million per year / 20 projects
- Funding Category : Manpower costs, consumables, research expenses, contingency, project-related visits of researchers to the counterpart country, and overhead.
  - ※ Large expensive equipment does not qualify as an eligible cost
- Evaluation Criteria : Scientific Excellence, Quality of project management and methodology, Quality of consortium, Division of roles and complementarity among partners, Expected Impact and Contributions to Science and Society
- Announcement of New Projects : February~April 2024
- Contact Point : Jong-Deok Kim, 02)3460-5681 / jdkim@nrf.re.kr

## Global Matching Joint Research Program - Sweden(New)

***To develop collaborative and strategic research projects with internationally highly qualified researchers to secure and create innovative research results in strategic research technologies***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
  - ※ PIs in basic research programs of NRF are allowed to take part in the program
- Research Fields : 12 strategic research technology fields : Semiconductor and display; Secondary battery cell; Leading-edge mobility; Next generation nuclear energy; Leading edge bio; Aerospace and marine; Hydrogen; Cybersecurity; AI; Next generation communications; Leading edge robotics and manufacture; and quantum
- Funding : 3 years / KRW 200 million per year / 10 projects
- Evaluation Criteria : Scientific Excellence, Quality of project management and methodology, Quality of consortium, Division of roles and complementarity among partners, Expected Impact and Contributions to Science and Society
- Funding Category : Joint seminars, conferences, workshops, Exchanges of individuals, Costs for relevant consumables up to a small fraction of the grant, etc.
- Announcement of new projects : February~April 2024
- Contact Point : Jong-Deok Kim, 02)3460-5681 / jdkim@nrf.re.kr

## Global Matching Joint Research Program - UK(New)

***To improve research capability and create innovative basic research results by collaborating the outstanding researchers overseas***

- Eligibility : Full-time faculty or researchers in universities or in GRIs within 7 years of obtaining a Ph.D. or less than 39-year old or five years of being appointed to the position of the assistant professor or higher
  - ※ PIs in basic research programs of NRF are allowed to take part in the program
- Research Fields : All Science and Technology Fields
- Funding : 3 years / KRW 120 M per year / 5 projects
- Funding Category : labor costs, consumables, research expenses, project-related travel expenses of researchers to the counterpart country, and overhead costs
- Evaluation Criteria : Scientific Excellence, Quality and Efficiency of project implementation, Capacity and role of each participant, Complementarity with partners, Expected Outcomes and Impacts
- Announcement of New Projects : February~April 2024
- Contact Point : Yurim Chung, 02)3460-5721 / yrj@nrf.re.kr

3

## Top-tier Institutions Cooperation Platform(New)

***To establish a world-class top-tier cooperation platform between domestic and overseas research institutions, thereby developing a world-class global research milestone***

- Eligibility : Full-time faculty or researchers in universities or in GRIs, etc.
- Qualification of PI : The principal investigator must be affiliated with a domestic hosting R&D institution and must be capable of overseeing and managing participating researchers.
  - The principal investigator is limited to undertaking a maximum of two additional projects as a principal investigator for other national R&D projects, based on the application deadline for new projects
- Research Fields : ① 12 national strategic technology fields  
② Solving global issues\*, ③ Core basic technologies
  - \* Infectious diseases, climate change, marine pollution, disaster preparedness, public technology solutions, etc.
- Funding Duration : up to 10 years(3+4+3)
- Funding Amount : KRW 2,300 million per year
- Contact Point : Mijung Choi, 02)3460-5742 / mjc@nrf.re.kr

4

## Global R/D Center(GRDC) Cooperation Hub

***To perform bilateral and multilateral cooperation research with strategic purpose in the globally important research areas and establish virtuous cycle of talented researchers with overseas research institutions***

- Eligibility : Full-time faculty or researchers in universities or in GRIs, etc.
- Research Fields : To solve public problem such as infectious diseases, material/part research in renewable energy fields for climate change, environment pollution, etc.
- Funding Duration : Type 1 - up to 6 years(GRDC Group Research)  
Type 2 - up to 3 years(Extension of Global Research Network)
- Funding Amount : Type 1 - KRW 600 M/year, Type 2 - KRW 300 M/year
- Supporting Details : Type 1- Secure basic and core original technology and talented human resources  
Type 2- Extension of domestic and international network
- No. of Projects : 5 projects
- Announcement : Feb. ~ Apr., 2024
- Contact Point : Jeong Hong Jo, 02)3460-5745/ jhj99@nrf.re.kr

5

## Korea-EU Joint Research Program (matching fund)

***To promote involvement of Korean researchers in European research by supporting domestic participants in Horizon Europe***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
  - For joint research projects, researchers who joined the EU consortium and got an approval from EU commission
- Research Fields : All Horizon Europe fields
- Funding Amount
  - (Joint research) 2~4 years / KRW 150 M per project
  - (Mobility) 2~4 years / KRW 50 M per project
  - (Preparatory) 1 year / KRW 25 M per project
- Funding Category : Expenses for Joint research, overseas business trip and seminars
- Announcement of new projects : May to July 2024
- Contact Point : Kang Youngock, 02)3460-5722 / yokang@nrf.re.kr

6

## NRF Bilateral Exchange Program

***To establish global R&D network by supporting researcher exchanges between Korean researchers and their overseas partners***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
- Research Fields : All academic fields(Limited to S&T for some countries)
- Funding Duration : 2 years
- Funding Amount : KRW 15~30 M/year
- Eligible countries : Brazil, Taiwan, Vietnam, Thailand, Belgium, Switzerland, Türkiye, Italy, Czech Republic, France
- Supporting Details : Expenses for short-term visits, organization of seminars/workshops
- No. of Projects : about 40 projects
- Announcement : April~June, 2024
- Contact point : HONG Jihee, 02-3460-5683 / hong625@nrf.re.kr  
Taesung Lee, 02-3460-5684 / taesunglee@nrf.re.kr

## NRF International Mobility Program

***To support the exchange of researchers, organization of seminars or workshops which can lead to further cooperation of joint research activities***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
- Research Fields : All academic fields
- Funding Duration : 1 year
- Funding Amount : KRW 30 M/year
- Exception countries : Brazil, China, Japan, Taiwan, Vietnam, Thailand, Germany, Belgium, Switzerland, Sweden, Spain, Austria, Italy, Czech Republic, Türkiye, France
- Supporting Details : Expenses for short-term visits, organization of seminars/workshops
- No. of Projects : 54 projects
- Announcement : March, 2024
- Contact point : Hong Jihee, 02-3460-5683 / hong625@nrf.re.kr

## NRF-JSPS Cooperation Programs

***To exchange up-to-date science knowledge and information and promote the development into large scale research projects by supporting organization of seminars and joint research between Korea and Japan***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
- Research Fields : All academic fields
- Funding Duration : (Joint research) - 2 years, (Seminar) - One time
- Funding Amount : (Joint research) - KRW 15 M/project, (Seminar) - KRW 8M/seminar
- Supporting Details : Expenses for short-term visits, organization of seminars/workshops
- No. of Projects : (Joint research) 15 projects (Seminar) 5 projects
- Announcement : June, 2024
- Contact point : Hong Jihee, 02-3460-5683 / hong625@nrf.re.kr

## Korea-China Joint Research Program

***To promote the joint research activities and mutual S&T development between Korea and China***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
- Research Fields : BT, ICT, Renewable Energy, Medical Science, Aerospace, Climate Change
- Funding Duration : 3 years
- Funding Amount : KRW 60 M / year / 6 projects
- Funding Category : Expenses for Joint research, research visits, seminars/workshops
- Announcement of new projects : September to December, 2024(TBD)
- Contact Point : Sangho Woo, 02)3460-5702 / woosh@nrf.re.kr

## Korea-China Large I-U-R\* Joint Research Program

\*Industry-University-Research Institute

***To serve as a comprehensive platform for SW&T cooperation and joint research between Korea and China***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
- Research Fields : BT, ICT, Renewable Energy
- Funding Duration : 3 years
- Funding Amount : KRW 500 million per year / 2 Projects
- Funding Category : Expenses for Joint research, research visits, seminars/workshops
- Announcement of new projects : September to December, 2024(TBD)
- Contact Point : Sangho Woo, 02)3460-5702 / woosh@nrf.re.kr

## Korea-US AFOSR\* Joint Research Program

***To promote the joint research activities with US researchers in the emerging technologies***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
- Research Fields : Quantum Materials
- Funding Duration : 3 years / 3 projects
- Funding Amount : KRW 110 million per year
- Funding Category : Expenses for Joint research, research visits, seminars/workshops
- Announcement of new projects : June, 2024
- Contact Point : Chanseob Shin, 02)3460-5704 / manchu6d@nrf.re.kr

## R&D Network(DFG)/GEnKO(DAAD) Programs with Germany

***To promote the organization of seminars/workshops and short term research visits with German researchers***

- Eligibility : Faculty members in universities, researchers in GRIs, etc
- Research Fields : All academic disciplines
- Funding Duration : R&D Network -1 year, GEnKO-2~3 years
- Funding Amount : R&D Network - KRW 20 million, GEnKO - 30 million per year
- Funding Category : Expenses for Joint research, research visits, seminars/workshops
- Announcement of new projects : February ~ June, 2024
- Contact Point : Jong-Deok Kim, 02)3460-5681 / jdkim@nrf.re.kr

## Korea-France Coopertive Development Program(STAR)

***To strengthen the S&T partnership by creating opportunities to explore and expand the networking activities between Korea and France***

- Eligibility : Faculty members in universities, researchers in GRIs, etc
- Research Fields : All S&T fields
- Funding Duration / No. of Projects : 2 years / 15 projects
- Funding Amount : KRW 15 M per year
- Funding Category : Expenses for Joint research, research visits, seminars
- Announcement of new projects : February to April 2024
- Contact Point : Seonghui Seo, 02)3460-5723 / seonghui@nrf.re.kr

4

## Korea-Italy Cooperative Development Program

***To contribute to the enhancement of research capabilities and promote scientific and technological cooperation between Korea and Italy***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
- Research Fields : Environmental sciences and energy transition, Physics and astrophysics, Biomedicine and technologies to face new infectious diseases, Agriculture and Foods, Prevention of natural disasters, Marine Resources for biotechnology, Advanced materials and nano-technology, New materials, Basic Research, S&T applied to cultural heritage
- Funding Duration / No. of Projects : 3 years(2022~2025) / 12 projects
- Funding Amount : KRW 30 million per year
- Funding Category : Expenses for Joint research, research visits, seminars/workshops
- Announcement of new projects : 2025(TBD)
- Contact Point : Seonghui Seo, 02)3460-5723 / seonghui@nrf.re.kr

## Korea-Switzerland Young Researchers' Exchange Program

***To enhance research achievements and strengthen the S&T cooperation networks through reciprocal visits of young researchers between Korea and Switzerland***

- Eligibility : PhD students, Post-Doc. researchers
- Research Fields : All S&T fields
- Funding Duration / No. of Projects : Up to 3 months, 1 year / 9 projects
- Funding Amount : KRW 10 M per year
- Funding Category : Research visits
- Announcement of new projects : April 2024
- Contact Point : Seonghui Seo, 02)3460-5723 / seonghui@nrf.re.kr

## Korea-India Joint Research Program

***To strengthen the basis for S&T cooperation and expand the joint research activities in high-tech manufacturing, energy, healthcare and IT fields by building collaboration networks between Korea and India***

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
- Research Fields : S&T fields agreed by Korea-India Joint Committee Meeting  
e.g. NT, IT, BT, CT
- Funding Duration : 2 - 3 years
- Funding Amount : KRW 40 M / per year / 12 projects
- Funding Category : Expenses for Joint research, research visits, seminars/workshops
- Announcement of new projects : March to April 2025(TBD)
- Contact Point : Sungbeen Park, 02)3460-5701 / sbpark725@nrf.re.kr

## Korea-Vietnam Joint Research Program

***To promote the S&T innovation and competitiveness through supporting S&T cooperation between Korea and Vietnam***

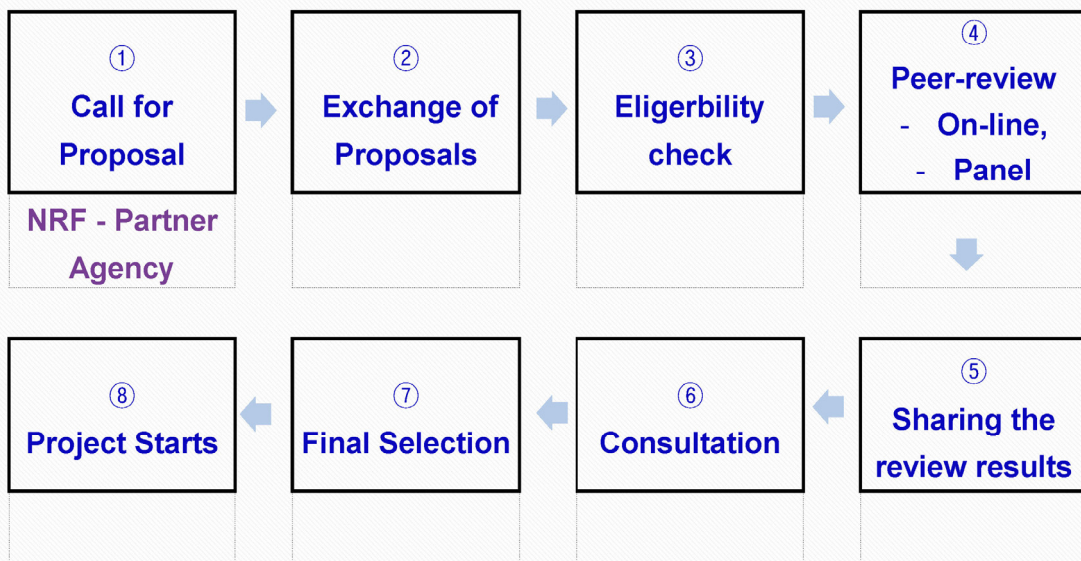

- Eligibility : Faculty members in universities, researchers in GRIs, etc.
- Research Fields : S&T areas agreed upon e.g. NT.IT. BT, CT
- Funding Duration : 3 years
- Funding Amount : KRW 40 M / year / 10 projects
- Funding Category : Expenses for Joint research, research visits, seminars/workshops
- Announcement of new projects : March to April 2024(TBD)
- Contact Point : Sungbeen Park, 02)3460-5701 / sbpark725@nrf.re.kr

# 03

## Review Process

### Review Process

### Online Written Review

- Each proposal is reviewed by 5(five) reviewers in related fields
- The result will be monitored by Panel Review Committee which is made of CRB(RB)
- Blind review is used for some programs

### Panel Review

- Each panel is made up of 4~15 members for 5~30 applications
- Exchange views from a broad perspective, decide the recommendation for funding
- Discussion only/ Presentation & Discussion

### Selection of Reviewers

- Reviewers are chosen from a NRF database(pool of reviewers) through a process conducted fairly and impartially by the RB/CRB/PM (ad-hoc base)
- Only persons with appropriate expertise and without disqualifying conflict of interest can be appointed

- Scientific Excellence of the Project
- Quality of Project Management and Methodology
- Research Capability of Participating Researchers
- Division of Roles and Complementarity among Partners
- Added Value from the International Cooperation
- Expected Impact and Contributions to Science and Society

# Thank you

National Research Foundation of Korea

# Research Programs in Humanities & Social Sciences

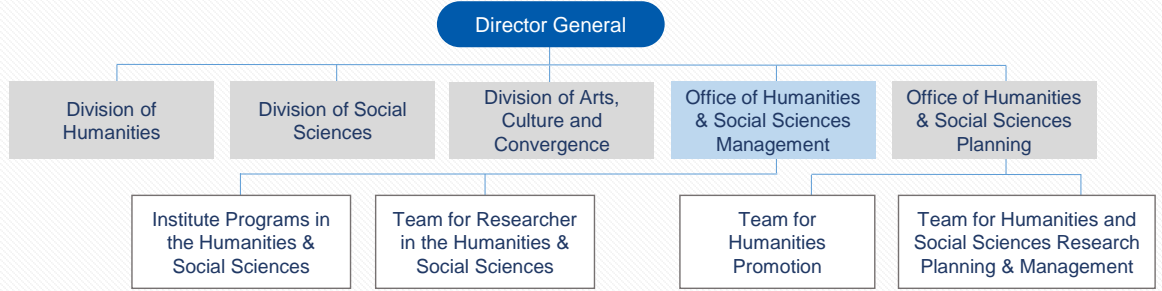

01

## Overview

# Directorate for Humanities & Social Sciences

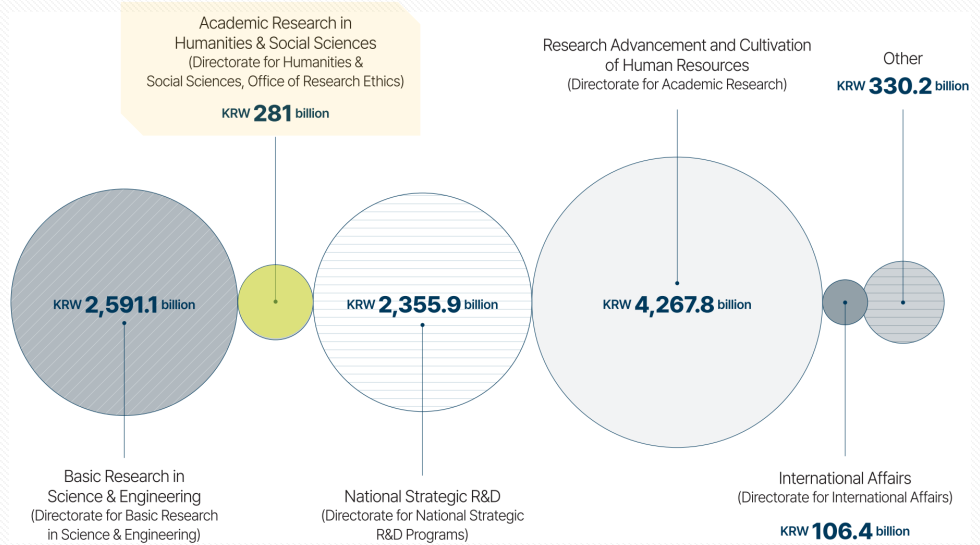

## Organizaition

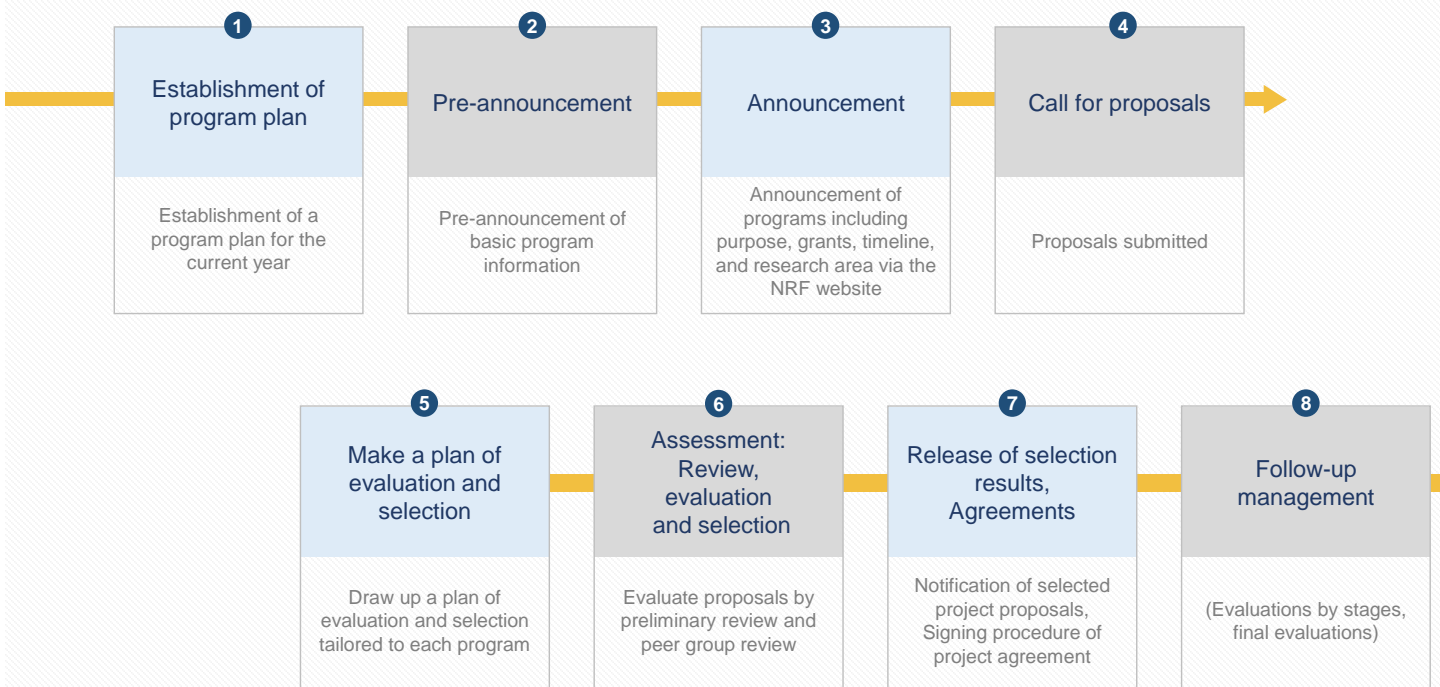

## Budget (FY2024)

**Total KRW 9,932.4 billion**

\* Based on the budget confirmed by the National Research Foundation of Korea Board of Directors for 2024 (Feb. 2024)

## Overview of Funding Scheme

# Programs structure

Support for Next-generation Researchers	Support for Individual Researchers	
Academic Research Professors, Research Subsidies for Ph.D Candidates	Young researchers/ Mid-career researchers, Excellent Scholars	Masterpieces translation, Book writing for publication

Group Research Support				
Joint Research	Global Humanities and Social Sciences Convergence Research	Humanities & Social Sciences Institute Program	Social Sciences Korea Program (SSK)	Humanities Korea Program (HK <sup>+</sup> )

Infrastructure Building and Performance Diffusion Support			
Humanities and Social Sciences Convergence Talent Training Universities	Support for Diffusion of Basic Studies (Popularization of Humanities, Support for Academic Organizations, Excellent Academic Books)	Joint Academic Resources Management System	Research Ethics

# 02

## Major Programs

# Individual Research Programs

## ☑ Young Researchers Program

### Purpose

To drive for creative researches conducted by young researchers and encourage them to grow into outstanding scholars in the future

### Summary

Research Areas	Eligibility	Funding Amount	Funding Duration
Humanities and social sciences (including the arts and physical education)	<ul style="list-style-type: none"> <li>Currently affiliated to a domestic university</li> <li>University faculty employed at the level of assistant professor or higher for at least 5 years, OR who obtained a doctoral degree within the last 10 years</li> <li>Must have 3 or more publications in the past 5 years</li> </ul>	Up to KRW 20 million/yr	1~3 years
Evaluation	Criteria	Excellence and creativity of research proposal, research capacity, expected outcome, etc. * depends on different types	
	Process	1 <sup>st</sup> Eligibility Review → 2 <sup>nd</sup> Field Evaluation (online review) → 3 <sup>rd</sup> Comprehensive Review	

### Schedule (tentative)

# Individual Research Programs

## ☑ Mid-Career Researchers Program

### Purpose

To strengthen mid-career researchers' academic capacity and encourage the balanced development of various studies based on research diversity

### Summary

Research Areas	Eligibility	Funding Amount	Funding Duration
Humanities and social sciences (including the arts and physical education)	<ul style="list-style-type: none"> <li>Currently affiliated to a domestic university</li> <li>University faculty employed at the level of assistant professor or higher for more than 5 years, OR who obtained a doctoral degree more than 10 years ago</li> <li>Must have 3 or more publications in the past 5 years</li> </ul>	Up to KRW 20 million/yr or KRW 10 million/yr * depends on different types	1~3 years or 10 years (5+5) * depends on different types
Evaluation	Criteria	Excellence and creativity of research proposal, research capacity, expected outcome, etc. * depends on different types	
	Process	1 <sup>st</sup> Eligibility Review → 2 <sup>nd</sup> Field Evaluation (online review) → 3 <sup>rd</sup> Comprehensive Review	

### Schedule (tentative)

# Individual Research Programs

## ☑ Excellent Scholars Program

### Purpose

To support outstanding scholars in the humanities and social sciences, disseminate research outcomes throughout society and promote them to foster younger generation in their fields

### Summary

Research Areas	Eligibility	Funding Amount	Funding Duration
Humanities and social sciences (including the arts and physical education)	<ul style="list-style-type: none"> <li>Currently affiliated to a domestic university</li> <li>Who obtained a doctoral degree more than 10 years ago OR who have 10+ years of experience as an assistant professor</li> <li>Must have 12 or more publications including books in the past 10 years</li> <li>Recommended by more than 3 eligible researchers or domestic academic journals</li> </ul>	KRW 50 million/yr	5 years (3+2)
<b>Evaluation</b>	<b>Criteria</b>	Excellence of research proposal, research capacity, expected outcome	
	<b>Process</b>	1 <sup>st</sup> Eligibility Review → 2 <sup>nd</sup> Field Evaluation (panel review in two phases) → 3 <sup>rd</sup> Comprehensive Review	

### Schedule (tentative)

# Individual Research Programs

## ☑ Joint Research Program

### Purpose

To increase synergy in research activities and enhance research capabilities by supporting domestic and international joint researches

### Summary

Research Areas	Eligibility	Funding Amount	Funding Duration
Humanities and social sciences (including the arts and physical education)	<ul style="list-style-type: none"> <li>Currently affiliated to a domestic university</li> <li>The PI must have 5 or more publications in the past 5 years.</li> <li>Each of teams must consist of 2 or more eligible collaborators.</li> </ul>	Up to KRW 50 million/yr or KRW 80 million/yr or KRW 100 million/yr * Depends on different types	1~3 years * Depends on different types
<b>Evaluation</b>	<b>Criteria</b>	Excellence and creativity of research proposal, research capacity, expected outcome, appropriateness of research period and research fund, etc. * depends on different types	
	<b>Process</b>	1 <sup>st</sup> Eligibility Review → 2 <sup>nd</sup> Field Evaluation (panel review) → 3 <sup>rd</sup> Comprehensive Review	

### Schedule (tentative)

# Individual Research Programs

## ☑ Global Humanities and Social Sciences Convergence Research Program (Research Group Type)

### Purpose

To enhance global research capabilities and establish a robust infrastructure for humanities and social science research by collaborating with world-leading researchers

### Summary

Research Areas	Eligibility	Funding Amount	Funding Duration
Interdisciplinary research in the humanities and social sciences and STEM fields*	<ul style="list-style-type: none"> <li>The PI must have 5 or more publications in the past 5 years, while currently being affiliated in domestic universities or research institutions.</li> <li>Each of teams must have 5 or more eligible collaborators.</li> </ul>	Up to KRW 150 million/yr for domestic research groups, KRW 220 million/yr for international research groups	3 years

\* science, technology, engineering, and mathematics

Evaluation	Criteria	Research capacity and excellence of research proposal, necessity of the projects, expected outcomes, etc. * depends on different types
	Process	1 <sup>st</sup> Eligibility Review → 2 <sup>nd</sup> Field Evaluation (panel review) → 3 <sup>rd</sup> Comprehensive Review

### Schedule (tentative)

# Group Research Programs

## ☑ Humanities & Social Sciences Institute Program

### Purpose

To foster research hubs and produce outstanding research outcomes through specialized research institutes in the humanities and social sciences

### Summary

Research Areas	Eligibility	Funding Amount	Funding Duration
Humanities and social sciences (including the arts and physical education)	<ul style="list-style-type: none"> <li>University-affiliated research institutes and domestic research institutions</li> <li>The PI must have 3 or more publications in the past 5 years, currently being affiliated in domestic universities.</li> <li>Each of teams must have 3 or more collaborators and 3 or more full-time researchers.</li> </ul>	Up to KRW 260 million/yr	6 years (3+3)

Evaluation	Criteria	Development plan for institutes, research plan, training plan for younger researchers, etc. * depends on different types
	Process	1 <sup>st</sup> Eligibility Review → 2 <sup>nd</sup> Field Evaluation (panel review + presentation) → 3 <sup>rd</sup> Comprehensive Review

### Schedule (tentative)

# Group Research Programs

## Global Humanities and Social Sciences Convergence Research Program (Research Institutes Type)

### Purpose

To support collaborative research with excellent research groups and research institutes abroad, aiming to produce preeminent convergence research results in the fields of humanities and social sciences

### Summary

Research Areas	Eligibility	Funding Amount	Funding Duration
Interdisciplinary research in the humanities and social sciences and STEM fields*	<ul style="list-style-type: none"> <li>University-affiliated research institutes and domestic research institutions</li> <li>The PI should be a director of the research institutes/institutions.</li> <li>Each of teams must have 5 or more eligible collaborators.</li> </ul>	Up to KRW 520 million/yr for domestic research groups, KRW 650 million/yr for international research groups	3 years for domestic research groups, 6 years(3+3) for international research groups
<b>Evaluation</b>	<b>Criteria</b>	Research capacity and excellence of research proposal, necessity of the projects, expected outcomes, etc. * depends on different types	
	<b>Process</b>	1 <sup>st</sup> Eligibility Review → 2 <sup>nd</sup> Field Evaluation (panel review + presentation) → 3 <sup>rd</sup> Comprehensive Review	

\* science, technology, engineering, and mathematics

### Schedule (tentative)

# Group Research Programs

## Social Science Korea – Global Agenda Research (International)

### Purpose

To support collaborative research with leading international researchers in order to strengthen global research capacity and generate practical outcomes on global agendas

### Summary

Research Areas	Eligibility	Funding Amount	Funding Duration
Social Sciences (including humanities-social science interdisciplinary fields)	<ul style="list-style-type: none"> <li>University-affiliated research institutes and domestic research institutions</li> <li>The PI must have 3 or more publications in the past 5 years, being a full-time faculty in the social science field at universities.</li> <li>Each team must have 6 or more collaborators.</li> </ul>	Up to KRW 320 million/yr	3 years
<b>Evaluation</b>	<b>Criteria</b>	Agenda compatibility, research plan, research team organization and framework, etc.	
	<b>Process</b>	1 <sup>st</sup> Eligibility Review → 2 <sup>nd</sup> Field Evaluation (panel review + presentation) → 3 <sup>rd</sup> Comprehensive Review	

### Schedule (tentative)

# Group Research Programs

## ☑ Humanities Korea Plus (HK+)

### Purpose

To build humanities research infrastructure and produce world-class humanities research outcomes by intensively fostering humanities research institutes within universities

### Summary

Research Areas	Eligibility	Funding Amount	Funding Duration
Humanities	University-affiliated research institutes	(Type1) 1.7billion/yr (Type2) 300million/yr	7 years (3+4)
Evaluation 	Criteria	Research agenda, research team organization and framework, local humanities, etc.	
	Process	1 <sup>st</sup> Eligibility Review → 2 <sup>nd</sup> Field Evaluation (panel review + presentation) → 3 <sup>rd</sup> Comprehensive Review	

### Schedule

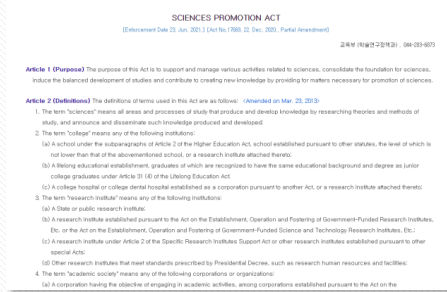

\* Not determined yet

03

# Project Management

# Rules and Regulations

- Most of programs are subject to “NATIONAL RESEARCH AND DEVELOPMENT INNOVATION ACT(국가연구개발혁신법)” and “SCIENCES PROMOTION ACT(학술진흥법)”.

\* You can visit the website of Korean law information center(<https://www.law.go.kr/LSW/eng/engMain.do>) to find more.

- Research funds should be used and managed according to the “Guidelines on the Use of Funds for Humanities and Social Sciences Research Programs(인문사회분야 학술연구지원사업 가이드라인)”.
- Researchers can carry out 5 or less projects at the same time, and he/she can perform up to 3 projects as a PI at the same time.
  - ✓ Researchers can carry out 3 or less projects in Humanities and Social Sciences at the same time, and he/she can perform up to 2 projects as a PI at the same time.
- Every beneficiary needs to take a course of Research ethics for research manager/participants researchers(Humanities & Social Sciences) within 3 months from the start of the projects.

# Publication Report

- Every beneficiary is obliged to report their publications resulting from funded project.

## Deadline

- Within two years\* of end of research period

\* You would be requested to maintain your affiliations in Korea for at least 2 years longer than your project period.

## Method

- Online submission (<https://ernd.nrf.re.kr/>)

## Requested Volumes

- Minimum of 1 or 2 publications per year of support

\* May differ to each program

### Recognition Criteria

- Papers: Each paper published in journals indexed or indexed candidates by the NRF or indexed by SCI(E), A&HCI, SSCI, SCOPUS, with the researcher as the first or corresponding author, will be counted as one achievement.
- Books/Translations: Each individually-authored or translated book counts as three achievements, while each co-authored or co-translated book count as two.

# Thank you
